HISTORY

20% DISCOUNT ON ALL TITLES 2022
Dear Reader,

It’s with great excitement and pride that we present Stanford University Press’s newest titles in history: a wide-ranging list that showcases the best of new and path-breaking historical scholarship. The pages of this catalog represent the culmination of years of work—on behalf of our authors, of course, but if there’s anything the past two years have shown, it’s that none of us are operating in a vacuum. I want to thank not only the authors who have entrusted us with their work, but also their mentors, colleagues, and families who have made the writing of these books possible—often under less-than-ideal circumstances. I’m continually impressed by the resilience, resourcefulness, and dedication of my SUP colleagues in production, marketing and sales, and administration, who have met the challenges of the past two years with an unflagging commitment to ensuring every book we produce is given individual attention and meets the very highest standards of quality.

I’m honored to have had the chance to work on the titles in the pages that follow, and whatever the coming year may bring, I look forward to continuing to publish books that challenge traditional boundaries and ask big questions. Thank you for reading, engaging, and supporting the vital work of university presses.

The Baron
Maurice de Hirsch and the Jewish Nineteenth Century
Matthias B. Lehmann
While in his time Baron Maurice de Hirsch was the subject of widespread praise, enragéd political commentary, and conspiracy theories alike, his legacy is often overlooked. Hirsch was one of the emblematic figures of the nineteenth century, and above all, the most influential Jewish philanthropist of his time. Hirsch’s vast fortune derived from his role in creating the first rail line linking Western Europe with the Ottoman Empire, what came to be known as the Orient Express. Hirsch rose to the pinnacle of European aristocratic society, but also found himself the frequent target of vicious antisemitism. In The Baron, Matthias B. Lehmann tells the story of this remarkable figure whose life and legacy provide a key to understanding the forces that shaped modern Jewish history.

Koreatown, Los Angeles Immigration, Race, and the “American Dream”
Shelley Sang-Hee Lee
Koreatown, Los Angeles tells the story of an American ethnic community often equated with socioeconomic achievement and assimilation, but whose experiences as racial minorities and immigrant outsiders illuminate key economic and cultural developments in the United States since 1965. Beginning with the early development of LA’s Koreatown and culminating with the 1992 Los Angeles riots and their aftermath, Shelley Sang-Hee Lee demonstrates how Korean Americans’ lives were shaped by patterns of racial segregation and urban poverty, and legacies of anti-Asian racism and orientalism. More than a dot on a map, Koreatown holds profound emotional significance for Korean immigrants across the nation as a symbol of their shared bonds and place in American society.

1368
China and the Making of the Modern World
Ali Humayun Akhter
The establishment of the Great Ming dynasty in 1368 was a monumental event in world history. A century before Columbus, Beijing sent a series of diplomatic missions across the South China Sea and Indian Ocean that paved the way for China’s first modern global era. In 1368, Ali Humayun Akhter maps China’s ascendance from the embassies of Admiral Zheng He to the arrival of European mariners and the shock of the Opium Wars. Akhter’s new picture of world history, China’s current rise evokes an earlier epoch, one that sheds light on where Beijing is heading today. This book provides much-needed context for understanding China’s rise and to see into its future of its connections with the West and a resurgent Asia.

“The Atlantic Realists
Empire and International Political Thought Between Germany and the United States
Matthew Specter
In The Atlantic Realists, intellectual historian Matthew Specter offers a boldly revisionist interpretation of “realism,” a prevalent stance in post-WWI US foreign policy and public discourse, and traces the development of international relations theory during the Cold War. Challenging the common view of realism as a set of universally binding truths about international affairs, Specter argues that its major features emerged from a century-long dialogue between American and German intellectuals beginning in the late nineteenth century. Focusing on key figures in the evolution of realism thought, including Carl Schmitt, Hans Morgenthau, and Wilhelm Grewe, Specter traces the development of the realist worldview, dismantling myths about the national interest, Realpolitik, and the “art” of statesmanship.

“Specter puts the theory of political realism into a wholly new light as a transatlantic exchange of ideas between the US and Germany. An original, an illuminating, a brilliant book.”

**Oaxaca Resurgent**

*Indigeneity, Development, and Inequality in Twentieth-Century Mexico*

A. S. Dillingham

Oaxaca Resurgent examines how indigenous people in one of Mexico’s most rebellious states shaped local and national politics during the twentieth century. Focusing on the experiences of anthropologists, government bureaucrats, trade unionists, and activists, A. S. Dillingham explores the relationship between indigeneity, rural education and development, and the political radicalism of the Global Sixties. By centering indigenous expressions of anticolonialism, Oaxaca Resurgent offers key insights into the entangled histories of indigenous resistance movements and the rise of state-sponsored multiculturalism in the Americas. This revelatory book provides crucial context for understanding post-1968 Mexican history and the rise of the 2006 Oaxacan social movement.

“With care and empathy, Dillingham persuasively argues that Oaxaca’s gift for our contemporary world may as well reside on the indomitable energy and plurality of vision of its many indigenous communities.”

**Vendors’ Capitalism**

*A Political Economy of Public Markets in Mexico City*

Ingrid Bleynat

Mexico City’s public markets were integral to the country’s economic development, bolstering the expansion of capitalism from the mid-nineteenth to mid-twentieth centuries. These publicly owned and operated markets supplied households with everyday necessities and generated revenue for local authorities. At the same time, they were embedded in a wider network of economic and social relations that gave vendors an influence far beyond the running of their stalls. Vendors’ daily interactions with customers, suppliers, and local government shaped the city’s public sphere and expanded the scope of popular politics. *Vendors’ Capitalism* argues for the centrality of Mexico City’s public markets to the political economy of the city from the restoration of the Republic in 1867 to the heyday of the so-called “Mexican miracle” and the PRI in the 1960s. “This compelling book illuminates Mexico City markets as the nexus of economic and political forces in Mexican history.”

*Histories of Native Autonomy in Brazil*

Heather F. Roller

Around the year 1800, independent Native groups still effectively controlled about half the territory of the Americas. How did they maintain their political autonomy and territorial sovereignty, hundreds of years after the arrival of Europeans? In a study that spans the eighteenth to twentieth centuries and ranges across the vast interior of South America, Heather F. Roller examines this history of power and persistence from the vantage point of autonomous Native peoples in Brazil. Rather than fleeing or evading contact, Native peoples actively sought to appropriate what was useful and potent from outsiders, incorporating new knowledge, products, and even people, on their own terms and for their own purposes. Their tactical decisions shaped and limited colonizing enterprises in Brazil, while revealing Native peoples’ capacity for cultural persistence through transformation. “Roller’s groundbreaking study is timely, stirring and revelatory.”

**New World of Gain**

*Europeans, Guarani, and the Global Origins of Modern Economy*

Brian P. Owensby

In the centuries before Europeans crossed the Atlantic, social and material relations among the indigenous Guarani people of present-day Paraguay were based on reciprocal gift-giving. But the Spanish and Portuguese newcomers who arrived in the sixteenth century seemed interested in the Guarani only to advance their own interests, either through material exchange or by getting the Guarani to serve them. Brian P. Owensby uses the centuries-long encounter between Europeans and indigenous people of South America to frame the notion of economic gain as a historical development rather than a matter of human nature. Owensby argues that gain—the pursuit of individual, material self-interest—must be understood as a global development that transformed the lives of Europeans and non-Europeans, wherever these two encountered each other in the great European expansion spanning the sixteenth to nineteenth centuries. “A revealing look at intersections of lived history and constructed memory.”

In the 1950s–80s, Brazil built one of the most advanced industrial networks among the “developing” countries, initially concentrated in the state of São Paulo. But from the 1980s, decentralization of industry spread to other states reducing São Paulo’s relative importance in the country’s industrial product. This volume draws on social, economic, and demographic data to document the accelerated industrialization of the state and its subsequent shift to a service economy amidst worsening social and economic inequality. Through its cultural institutions, universities, banking, and corporate sectors, the municipality of São Paulo would become a world metropolis. At the same time, given its rapid growth from 2 million to 12 million residents in this period, São Paulo would deal with problems of distribution, housing, and governance. This significant volume will be an invaluable reference for scholars of history, policy, and the economy in Latin America.

**Paletó and Me**

*Memories of My Indigenous Father*

Aparecida Vilaça

When Aparecida Vilaça first traveled down the remote Negro River in Amazonia, she expected to come back with notebooks and tapes full of observations about the Indigenous Wari’ people—but not with a new father. In *Paletó and Me*, Vilaça shares her life with her adoptive Wari’ family, and the profound personal transformations involved in becoming kin. Winner of the prestigious Casa de las Américas Prize, *Paletó and Me* is a celebration of life, weaving together the author’s own memories of learning the lifeways of Indigenous Amazonia with her father’s testimony to Wari’ persistence in the face of colonization. Speaking from the heart as both anthropologist and daughter, Vilaça offers an intimate look at Indigenous lives in Brazil over nearly a century. “Simple and profound, this book is a testament to an ethical, moral, and political commitment to the colonized peoples of America.”

The American Yawp
A Massively Collaborative Open U.S. History Textbook
Edited by Joseph J. Locke and Ben Wright
“I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world.”
—Walt Whitman, “Song of Myself,” Leaves of Grass
The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond.

Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past.

As part of a new publishing strand in U.S. history, Stanford University Press has issued a fully peer-reviewed and updated edition of The American Yawp. It is accessible online as an open educational resource and is available as a low-cost print textbook, published in two volumes.

Counterrevolution
The Crusade to Roll Back the Gains of the Civil Rights Movement
Stephen Steinberg
In Black Reconstruction W.E.B. Du Bois wrote, “The slave went free; stood for a brief moment in the sun; then moved back again toward slavery.” His words echo across the decades as the civil rights revolution, marked by the passage of landmark civil rights laws in the ‘60s, has seen those gains steadily and systematically whittled away. As history testifies, revolution nearly always triggers its antithesis: counterrevolution. In this book Steinberg provides an analysis of this backlash, tracing the reverse flow of history that has led to the current national reckoning on race, exploring the “victim-blaming” and “colorblind” discourses that emerged in the post-segregation era and undermined progress toward racial equality, and led to the gutting of affirmative action.

“This is an important intervention in the post-Floyd national debate about why the problem of race in the republic has been so long-lasting.”
—Charles W. Mills, The Graduate Center, CUNY

Citizens, Immigrants, and the Stateless
A Japanese American Diaspora in the Pacific
Michael R. Jin
From the 1910s to the eve of the Pacific War in 1941, more than 50,000 young second-generation Japanese Americans (Nisei) embarked on transpacific journeys to the Japanese Empire, putting an ocean between themselves and pervasive anti-Asian racism in the American West. Born U.S. citizens but treated as unwelcome aliens, this contingent of Japanese Americans—one in four U.S.-born Nisei—came in search of better lives but instead encountered a world shaped by increasingly volatile U.S.–Japan relations. Citizens, Immigrants, and the Stateless examines the deeply intertwined histories of Asian exclusion in the United States, Japanese colonialism in Asia, and volatile geopolitical changes in the Pacific world that converged in the lives of Nisei workers, students, sojourners, and survivors of the war.

“Michael R. Jin has transformed Nisei transnationalism from anecdote to experience. An impressive achievement.”

Building Downtown Los Angeles
The Politics of Race and Place in Urban America
Leland T. Saito
From the 1970s on, Los Angeles was transformed into a center for entertainment, consumption, and commerce for the affluent. Mirroring the urban development trend across the nation, new construction led to the displacement of low-income and working-class racial minorities, as city officials targeted these neighborhoods for demolition in order to spur economic growth and bring in affluent residents. In response to this displacement, there emerged a coalition of unions, community organizers, and faith-based groups advocating for policy change. In Building Downtown Los Angeles, Leland T. Saito traces these two parallel trends through specific construction projects and the backlash they provoked. He uses these events to theorize the past and present processes of racial formation and the racialization of place, unveiling new insights into the relationships between race, place, and policy.

Salinas
A History of Race and Resilience in an Agricultural City
Carol Lynn McKibben
Although much has been written about the urban–rural divide in America, the city of Salinas, California, like so many other places whose economies are based on agriculture, is at once rural and urban. This broad-ranging history of “the Salad Bowl of the World” tells a complex story of community-building in a multifaceted, multithetic city. Carol Lynn McKibben traces Salinas’s ever-changing demographics and the challenges and triumphs of Chinese, Japanese, Filipino, and Mexican immigrants, as well as Depression-era Dust Bowl migrants and white European settlers. Salinas deepens our understanding of race relations, economic development, and the impact of changing demographics on regional politics in urban California and the United States as a whole.

Dirty Works
Obscenity on Trial in America’s First Sexual Revolution
Brett Gary
At the turn of the twentieth century, the United States was experiencing an awakening. Victorian-era morality was being challenged by the introduction of sexual modernism and women’s rights into popular culture, the arts, and science. Dirty Works focuses on a series of significant courtroom cases—all represented by Morris L. Ernst. Over the course of his remarkable career, Ernst defended well-known European and American literary and sexual activists, among them Margaret Sanger, James Joyce, and Alfred Kinsey. These cases provided courts with a powerful body of precedents that recognized women’s reproductive rights and the legitimacy of sexual inquiry. The legacy of this important but largely unrecognized moment in American history must be reckoned with, as unrecognized moment in American

The Battle Nearer to Home
The Persistence of School Segregation in New York City
Christopher Bonastia
Despite its image as an epicenter of progressive social policy, New York City continues to have one of the nation’s most segregated school systems. Tracing the quest for integration in education from the mid-1970s to the present, The Battle Nearer to Home follows the tireless efforts by educational activists to dismantle the deep racial and socioeconomic inequalities that segregation reinforces. The fight for integration has shifted significantly over time, not least in terms of the way “integration” is conceived, from transfers of students and redrawing school attendance zones, to more recent demands for community control of segregated schools. In excavating the history of New York City school integration politics in the halls of power and on the ground, Christopher Bonastia untangles the enduring white resistance to integration and the severe costs paid by Black and Latino students.

The Paranoid Style in American Diplomacy
Oil and Arab Nationalism in Iraq
Brandon Wolfe-Hunnicutt
This book weaves together histories of Arab nationalists, US diplomats, and Western oil execs to expose the origins of US intervention in Iraq over the arc of the twentieth century and tell the parallel stories of the Iraq Petroleum Company and the resilience of Iraqi society. American policymakers, who inflated concerns about access to and potential scarcity of oil, gave rise to a “paranoid style” in US foreign policy. Brandon Wolfe-Hunnicutt deconstructs these policy practices to reveal how they fueled decades of American interventions, and shines a light on those places that America’s covert empire-builders might prefer we not look.

“The Paranoid Style in American Diplomacy is a gripping backstory that reveals the historical truths of US-Iraqi relations. American cold warriors inherited Britain’s imperial role but failed to stop Iraqis from pursuing natural resource sovereignty.”

The Nuclear Club
How America and the World Policed the Atom from Hiroshima to Vietnam
Jonathan R. Hunt
The Nuclear Club reveals how a coalition of powerful and developing states embraced global governance in hopes of a bright and peaceful tomorrow. While fears of nuclear war were ever-present, it was the perceived threat to their preeminence that drove Washington, Moscow, and London to throw their weight behind the 1965 Limited Test Ban Treaty (LTBT) banning nuclear testing underground, the 1967 Treaty of Tlatelolco banning atomic armaments from Latin America, and the 1968 Nuclear Non-Proliferation Treaty (NPT), forbidding more countries from joining the most exclusive club on Earth. This globe-spanning history demonstrates how even today, the nuclear order legitimizes foreign intervention worldwide, empowering the nuclear club and, above all, the United States, to push sanctions and even preventive war against atomic outlaws, all in humanity’s name.

Atomic Steppe
How Kazakhstan Gave Up the Bomb
Togzhan Kassenova
Atomic Steppe tells the story of how the marginalized Central Asian republic of Kazakhstan said no to the most powerful weapons in human history. With the fall of the Soviet Union, Kazakhstan suddenly found itself with the world’s fourth largest nuclear arsenal on its territory. Would it give up these fire-ready weapons—or try to become a Central Asian North Korea? This book takes us inside Kazakhstan’s extraordinary and little-known nuclear history from the Soviet period to the present. Equipped with intimate personal perspective and untapped archival resources, Togzhan Kassenova introduces us to the engineers turned diplomats, villagers turned activists, and scientists turned pacifists who worked toward disarmament.

Winning and Losing the Nuclear Peace
The Rise, Demise, and Revival of Arms Control
Michael Krepon
Winning and Losing the Nuclear Peace tells a remarkable story of high-wire acts of diplomacy, close calls, dogged persistence, and extraordinary success. Michael Krepon brings to life the pitched battles between arms controllers and advocates of nuclear deterrence, the ironic twists and unexpected outcomes from Truman to Trump. What began with a ban on atmospheric testing and a nonproliferation treaty reached its apogee with treaties that mandated deep cuts and corralled “loose nukes” after the Soviet Union imploded. Winning and Losing the Nuclear Peace is an engaging account of how the practice of arms control was built from scratch, how it was torn down, and how it can be rebuilt.

“Until now, there has been no comprehensive history of nuclear arms control; Michael Krepon’s masterful Winning and Losing the Nuclear Peace fills that ICBM-sized hole in the field.”

Cold War in Germany

Between Containment and Rollback
The United States and the Cold War in Germany
Christian F. Ostermann

In the aftermath of World War II, American diplomats and policymakers turned to the task of rebuilding Europe while keeping Communism at bay. Based on recently declassified documents, this book tells the story of U.S. policy toward Eastern Europe from 1945 to 1953. As the American approach shifted from “containment” to more active “rollback” of Communist power, the Truman and Eisenhower administrations worked to undermine Soviet-backed Communist rule without compromising economic and nation-building interests in Western Germany—a strategy that involved covert operations, propaganda, and psychological warfare. This international history tracks relations between East German and Soviet Communists, providing new perspectives on U.S. foreign policy as Cold War tensions coalesced.

“A model of outstanding historical research and argumentation.”
—Thomas Schwartz, Vanderbilt University

The Bleeding Wound
The Soviet War in Afghanistan and the Collapse of the Soviet System
Yaakov Ro’i

By the mid-1980s, public opinion in the USSR had begun to turn against Soviet involvement in Afghanistan: the Soviet-Afghan War (1979–1989) had become a long, painful, and unwinnable conflict, one that Mikhail Gorbachev referred to in a 1986 speech as the “bleeding wound.” Both the initial decision to send troops into Afghanistan and the eventual decision to withdraw created devastating ripples within Soviet society that, this book argues, became a major factor in the collapse of the Soviet Union. In this comprehensive survey of the effects of the war on Soviet society and politics, Yaakov Ro’i analyzes the opinions of Soviet citizens on a host of issues connected with the war and documents the systemic change that would occur when Soviet leadership took public opinion into account.

“An important and timely study that anyone interested in the region should read.”
—Artemy M. Kalinovsky, Temple University

Guns, Guerillas, and the Great Leader
North Korea and the Third World
Benjamin R. Young

Far from always having been an isolated nation and a pariah state within the international community, North Korea exercised significant influence among Third World nations during the Cold War era. With one foot in the socialist Second World and the other in the anticollective Third World, North Korea occupied a unique position as both a postcolonial nation and a Soviet client state. North Korea sent advisors to assist African liberation movements, trained anti-imperialist guerrilla fighters, and completed building projects in developing countries. State-run media coverage of the Third World shaped the worldview of many North Koreans and helped them imagine a unified anti-imperialist front that stretched from the boulevards of Pyongyang to the streets of the Gaza Strip and the beaches of Cuba.

“Thoroughly researched and absolutely eye-opening… An unprecedented look into the causes and consequences of North Korea’s struggle for international influence.”
—Mitchell Lerner, Ohio State University

Between Empire and Nation
Muslim Reform in the Balkans
Milena B. Methodieva

This book tells the story of the transformation of the Muslim community in modern Bulgaria during a period of imperial dissolution, conflicting national and imperial enterprises, and the emergence of new national and ethnic identities. Methodieva explores how former Ottoman subjects, now under Bulgarian rule, navigated between empire and nation-state, and sought to claim a place in the larger modern world. Using a wide array of primary sources and drawing on both Ottoman and Eastern European historiographies, Methodieva approaches the question of Balkan Muslims’ engagement with modernity through a transnational lens, arguing that the experience of this Muslim minority provides new insight into the nature of nationalism, citizenship, and state formation.

“This important new book is set to redefine the entanglements of modern history of Europe and the Middle East.”

Dream Super-Express
A Cultural History of the World’s First Bullet Train
Jessynam Abel

A symbol of the “new Japan” displayed at World’s Fairs, depicted in travel posters, and celebrated as the product of a national spirit of innovation, the Tokaidō Shinkansen—the first bullet train, dubbed the “dream super-express”—represents the bold aspirations of a nation rebranding itself after military defeat, but also the deep problems caused by the unbridled postwar drive for economic growth. At the dawn of the space age, how could a train become such an important symbol? In Dream Super-Express, Jessynam Abel contends that understanding the various, often contradictory, images of the bullet train reveals how infrastructure operates beyond its intended use as a means of transportation to perform cultural and sociological functions.

“Abel takes us on a magnificent journey opening windows onto the cultural and global significance of Japan’s technological achievements of the postwar era.”
—Andrew Gordon, Harvard University

Japan: A History
Eugene Y. Park

While popular trends, cuisine, and long-standing political tension have made Korea familiar in some ways to a vast English-speaking world, its recorded history of some two millennia remains unfamiliar to most. Korea: A History addresses general readers, providing an up-to-date, accessible overview of Korean history from antiquity to the present. Eugene Y. Park draws on original-language sources and recent East Asian and Western-language scholarship to provide an insightful and broad-ranging account. This book expands still-limited English-language discussions on pre-modern Korea, offering rigorous and compelling analyses of Korea’s modernization while discussing daily life, ethnic minorities, LGBTQ history, and North Korean history not always included in Korea surveys. Park breaks new ground on questions and debates that have been central to the field of Korean studies since its inception.

“This book offers a sweeping yet detailed overview of the Korean past.”

When the Iron Bird Flies
China’s Secret War in Tibet
Jianglin Li with a Foreword by His Holiness the Dalai Lama

From 1956 to 1962, devastating military conflicts took place in China’s southwestern and northwestern regions. These events would lead to the 14th Dalai Lama’s exile in India, as well as the Tibetan diaspora in 1959 and the destruction of most Tibetan monasteries in a concerted effort to eradicate local religion and scholarship. Official records at the time scarcely made mention of the campaign, and in the years since, only lukewarm acknowledgment of the violence has surfaced. When the Iron Bird Flies breaks this decades-long silence to reveal for the first time a comprehensive and explosive picture of the six years that would prove definitive in modern Tibetan and Chinese history.

“Written in a lively and accessible style, each chapter presents a skilfully crafted and entertaining narrative of events triggered by the PRC party-state’s efforts to intervene in one Chinese local society during the early 1940s. A valuable contribution to the field.”

—Michele Muscolino, University of California, San Diego

—David G. Atwill, Penn State University

“Authoritative, exhaustive, and reliable, Jianglin Li’s account sets a new standard for the history of Sino-Tibetan relations and deftly depicts the momentous historical transition of a region little known to outsiders.”

Global Medicine in China
A Diasporic History
Wayne Soon

In 1938, one year into the Second Sino-Japanese War, the Chinese military found itself in dire medical straits. Soldiers were suffering from deadly illnesses and were unable to receive blood transfusions for their wounds. The urgent need for medical assistance prompted an unprecedented flowering of scientific knowledge in China and Taiwan throughout the twentieth century. In this book, Wayne Soon draws on archives from three continents to argue that Overseas Chinese were key to this development, utilizing their global connections and diasporic links to procure much-needed money, supplies, and medical expertise. The remarkable expansion of care and education that they spurred shifted civilian institutions and laboratories and transformed it into an adaptive field-based practice for all.

“This illuminating transnational history integrates major biomedical transformations within the dramatic political convulsions of mid-century China.”

Delhi Reborn
Partition and Nation Building in India’s Capital
Rotem Geva

Delhi, one of the world’s largest cities, has faced momentous challenges—mass migration, competing governing authorities, controversies over citizenship, and communal violence. To understand the contemporary plight of India’s capital city, this book revisits one of the most dramatic episodes in its history, telling the story of how the city was remade by the twin events of partition and independence. Treating decolonization as a process that unfolded from the late 1930s into the mid-1950s, Rotem Geva traces how India and Pakistan became increasingly territorialized in the imagination and practice of the city’s residents, how violence and displacement were central to this process, and how tensions over belonging and citizenship lingered in the city and the nation.

“Brand New Nation takes us on a tour—a tour de force, really—of the changing trajectory of the nation-state. It is a riveting read, and a pathbreaking piece of work.”

Brand New Nation
Capitalist Dreams and Nationalist Designs in Twenty-First-Century India
Ravinder Kaur

The early twenty-first century was an optimistic moment of global futures-making. The chief narrative was the emergence of the BRIC nations branded afresh as resource-rich hubs of untapped talent and potential from the old third world that “opened up” for foreign investments. The tantalizing promise of economic growth invited investments in the nation’s exciting futures; it also offered utopian visions of “good times,” and even restoration of lost glory to the nation’s citizens. Grounded in the history of modern India, Brand New Nation reveals the on-the-ground experience of the relentless transformation of the nation-state into an attractive investment destination for speculative global capital.

“Brand New Nation takes us on a tour—a tour de force, really—of the changing trajectory of the nation-state. It is a riveting read, and a pathbreaking piece of work.”

From Raj to Republic
Sovereignty, Violence, and Democracy in India
Sunil Purushotham

Between 1946 and 1952, the British Raj, the world’s largest colony, was transformed into the Republic of India, the world’s largest democracy. Independence, the Constituent Assembly Debates, the founding of the Republic, and India’s first democratic general election occurred amidst the violence and displacement of the Partition and the forceful quelling of internal dissent. This book investigates the ways in which these violent conjunctures constituted a postcolonial regime of sovereignty and shaped the historical development of democracy in India at the foundational moment of decolonization and national independence. From Raj to Republic presents the story of how a national, territorial, republican, and liberal polity in India emerged out of a violent and contested process that forged new power relations and opened up historical trajectories with lasting consequences for modern India.

“A brillantly original account of India’s Partition.”

Media of the Masses
Cassette Culture in Modern Egypt
Andrew Simon

This book investigates the social life of the cassette tape to offer a multisensory history of modern Egypt. Over the 1970s and 1980s, cassettes became a ubiquitous presence in Egyptian homes and stores. Enabling an unprecedented number of people to participate in the creation of culture and circulation of content, cassette players and tapes soon informed broader cultural, political, and economic developments and defined “modern” Egyptian households. Drawing on a wide array of audio, visual, and textual sources that exist outside the Egyptian National Archives, Andrew Simon demonstrates how cassettes and cassette players did not simply join other twentieth century mass media like records and radio; they were the media of the masses.

“Simon’s masterful history of the cassette crystallizes the crucial importance of technology. Important for historians of modern Egypt, and a stellar contribution to the history of new media.”

Unknown Past
Layla Murad, the Jewish-Muslim Star of Egypt
Hanam Hammad

This book recounts Jewish-Muslim film star Layla Murad’s extraordinary life—and the rapid political and sociocultural changes she witnessed. Hammad writes a story centered on Murad’s persona and legacy, and broadly framed around a gendered history of twentieth-century Egypt. Murad was a Jew who converted to Islam in the shadow of the first Arab-Israeli war. Her career blossomed under the Egyptian monarchy and later gave a singing voice to the Free Officers and the 1952 Revolution. The definitive end of her cinematic career came under Nasser on the eve of the 1956 Suez War. Egyptians have long told their national story through interpretations of Murad’s life, intertwining the individual and Egyptian state and society to better understand Egyptian identity. As Unknown Past recounts, there’s no life better than Murad’s to reflect the tumultuous changes experienced over the dramatic decades of the mid-twentieth century.

Transnational Palestine
Migration and the Right of Return before 1948
Nadim Bavalsa

Migration from Palestine to the Americas developed over the mid-nineteenth century through the interwar period, during which time Palestinians emerged as a transnational political collective. Across the diaspora, these migrants discussed strategies for economic success in the Americas, for preserving aspects of their cultures, and for resisting oppressive British and French mandates’ legislation, including citizenship rejections meted out to thousands of Palestinian migrants. They did this in newspapers, social and cultural clubs and associations, political organizations and committees, and in hundreds of petitions and pleas delivered to local and international governing bodies demanding justice for Palestinian migrants barred from Palestinian citizenship. As this book shows, Palestinian political and national consciousness developed as a thoroughly transnational process in the first half of the twentieth century—and the first articulation of a Palestinian right of return emerged well before 1948.

Dear Palestine
A Social History of the 1948 War
Shay Hazkani

This book offers a new history of the 1948 War, focusing on the people caught up in the conflict and its transnational reverberations. Through their letters home, the young men and women who fought the war came to life, writing about everything from daily life to nationalism, colonialism, race, and the character of their enemies. Dear Palestine also examines how the architects of the conflict worked to influence and indoctrinate key ideologies in these ordinary soldiers, by examining battle orders, pamphlets, army magazines, and radio broadcasts. Through two narratives—the official and unofficial, the propaganda and the personal letters—Dear Palestine reveals the fissures between sanctioned nationalism and individual identity.

“The definitive end of her cinematic career came under Nasser on the eve of the 1956 Suez War. The City as Anthology
Eroticism and Urbanity in Early Modern Isfahan
Kathryn Babayan

This book tells a new history of Isfahan, at the transformative moment it became a cosmopolitan center of imperial rule. For a city with no extant state or civic archives, Kathryn Babayan reimagines an archive of anthologies to recover how residents shaped their communities and crafted their urban, religious, and sexual selves. She highlights eight residents—from king to widow, painter to religious scholar, poet to bureaucrat—who anthropologized their city, divulging their social, cultural, and religious spheres of life. Through them, we see the gestures, manners, and sensibilities of a shared culture that configured their relations and negotiated the lines between friendship and eroticism. These entangled acts of seeing and reading, desiring and writing converge to fashion the refined urban self through the sensual and the sexual.

This book traces the contested imaginations and practices of mobility from the conception of a trans-Iranian railway project during the nineteenth-century global transport revolution to its early years of operation on the eve of Iran’s oil nationalization movement in the 1950s. Weaving together various individual experiences, Mikiya Koyagi considers how the infrastructural megaproject reoriented the flows of people and goods. The railway project simultaneously brought the provinces closer to Tehran and pulled them away from it, thereby constantly reshaping local, national, and transnational experiences of space among mobile individuals.

“Weaving Taghi Arani’s life into a narrative of the railway project, this book offers one of the most iconic figures. A graduate of the University of Oxford and the French government, Hussein was an influential figure in Egypt during the parliamentary period. Examining Hussein’s actions against the backdrop of his complex relationship with the Egyptian state, the religious establishment, and the French government, Hussam R. Ahmed reveals modern Egypt’s cultural influence in the Arab and Islamic world. The Last Nahdawi offers both a history of modern state formation, revealing how the Egyptian state came to hold such a strong grip over culture and education—and a compelling examination of the life of the country’s most renowned intellectual.

“A lucid, insightful, and nuanced reassessment of Taha Hussein’s key role in twentieth-century Egypt’s cultural and political life.”

The Middle East and the Science of Human Heredity
Elise K. Burton

Genetic Crossroads is an unprecedented history of human genetics in the Middle East, from its roots in colonial anthropology and medicine to recent genome sequencing projects. Early in the twentieth century, technological breakthroughs in human genetics coincided with the birth of modern Middle Eastern nation-states, who proclaimed that the region’s ancient history as a cradle of civilizations was preserved in the bones and blood of their citizens. Elise K. Burton illuminates how scientists from Turkey to Yemen, from Lebanon, Algeria, and Sudan, this book will be an essential guide for political scientists, sociologists, and anthropologists, and up-to-date discussions of the Syrian Civil War, impacts of the Trump presidency, and the 2020 uprisings in Beirut, Damascus, and Baghdad. Hoping to satisfy spiritual yearnings, this new generation called themselves pilgrims—and their journeys, pilgrimages, Carel Bertram’s gifts of empathy and storytelling make for a book that is at once heartbreaking and inspiring. The proof of survival and a deeper understanding of the complex currents that shaped Jewish, North African, and world history over the course of the Second World War. The traumas of genocide, the struggle for anti-colonial liberation, and the eventual Jewish exodus from Arab lands all take on new meaning when reflected through the interstices of Benatar’s life. A courageous woman with a deep moral conscience and an iron will, Nelly Benatar helped to lay the groundwork for crucial postwar efforts to build a better world over Europe’s ashes. “Years of Glory illuminates major themes: that period’s refugee crisis, resistance in Morocco to the Vichy regime, a talented woman’s professional advancement in a traditional society, and the life of a once-vibrant Jewish community in North Africa. An exemplary unearthing of the remarkable legal career of Nelly Benatar.” —Robert O. Paxton, University of Pennsylvania

This powerful collage of testimonies offers us a greater understanding of what it is to be human, not just then but also today. With this book, her final and most personal work covering with such memories. “An ever timely account of the traumas that conflict imposes upon children and how they reverberate through time.” —Kirkus Reviews

This book engages six themes to understand the contemporary Middle East—the spread of sectarianism, abandonment of principles of state sovereignty, the lack of a regional hegemonic power, increased Saudi-Iranian competition, decreased regional attention to the Israel-Palestine conflict, and fallout from the Arab uprisings—as well as offers individual country studies. With analysis from historians, political scientists, sociologists, and anthropologists, and up-to-date discussions of the Syrian Civil War, impacts of the Trump presidency, and the 2020 uprisings in Lebanon, Algeria, and Sudan, this book will be an essential guide for anyone seeking to understand the current state of the region. “These essays are an indispensable guide to making sense of the Middle East’s current disorder and future direction. Translated from French, Arabic, North African Judeo-Arabic, Spanish, Hebrew, Moroccan Darija, Tamasight (Berber), Italian, and Yiddish, or transcribed from their original English, these sources are like the dots of a pointillist painting. Taken together, these writings shed light on how war, occupation, race laws, internment, and Vichy French, Italian fascist, and German Nazi rule were experienced day by day across North Africa. mixed-sex dancing functions as a flexible metaphor for the concerns of cultural transitions. Sonia Beth Gollance illustrates how dance scenes become a charged boundary transgression. In Jewish literature of the long nineteenth century, dance scenes are a complex arena for understanding the limits of acculturation, the dangers of ethnic mixing, and the implications of shifting gender norms and marriage patterns. Combining cultural history with literary analysis, Gollance shows how mixed-sex dancing was understood as the very sign of modernity—and the ultimate boundary transgression. In Jewish relationships, as any reader of people to meet, flirt, and form worlds.

Nothing Happened
A History
Susan A. Crane
What does it mean to look at the past and to remember that “nothing happened”? Why might we feel as if “nothing is the way it was”? This book transforms these utterly ordinary observations and redefines “Nothing” as something we have known and can remember. By paying attention to how we understand Nothing to be happening in the present, what it means to “know Nothing” or to “do Nothing,” we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, we can recover histories that were there all along. “Clever and funny and serious and illuminating. You won’t want to put it down.” —Martita Sturken, author of *Tourists of History*

The Strange Career of Racial Liberalism
Joseph Darda
This book traces the rise of liberal antiracism, showing how reformers’ faith in the moral arc of the universe has undercut future movements with the insistence that racism constitutes a time-limited crisis to be solved with time-limited remedies. Most historians attribute the shortcomings of the civil rights era to a conservative backlash or to the fracturing of the liberal establishment in the late 1960s, but the civil rights movement also faced resistance from a liberal “frontlash” from antiregulatory allies who constrained what the movement could demand and how it could demand it. Telling the stories of Ruth Benedict, Kenneth Clark, W. E. B. Du Bois, John Howard Griffin, Paul Murray, Lillian Smith, Richard Wright, and others, Darda reveals how Americans learned to wait on time for racial change and the enduring harm of that trust in the clock. “Provides essential bearings for our current moment.” —Daniel Martínez HoSang, Yale University

Prose of the World
Denis Diderot and the Periphery of Enlightenment
Hans Ulrich Gumbrecht
Philosopher, translator, novelist, art critic, and editor of the *Encyclopédie*, Denis Diderot was one of the liveliest figures of the Enlightenment. But how might we delineate the contours of his diverse oeuvre, which is clearly characterized by a centrifugal dynamic? Conjuring scenes from Diderot’s by turns turbulent and quiet life, offering close readings of several key books, and probing the motif of a tension between physical perception and conceptual experience, Hans Ulrich Gumbrecht demonstrates how Diderot belonged to a vivid intellectual periphery that included protagonists such as Lichtenberg, Goya, and Mozart. With this provocative, elegant work, he elaborates the existential preoccupations of this periphery, revealing the way they speak to us today. “A significant contribution by one of the world's leading literary scholars and public intellectuals.” —Markus Gabriel, author of *Why the World Does Not Exist*

Projecting Spirits
Speculation, Providence, and Early Modern Optical Media
Pasi Väliaho
The history of projected images at the turn of the seventeenth century reveals a changing perception of chance and order, contingency and form. Pasi Väliaho maps how the leading optical media of the period—the camera obscura and the magic lantern—developed in response to, and framed, the era’s key intellectual dilemma of whether the world fell under God’s providential care, or was subject to chance and open to speculating. As Väliaho shows, camera obscuras and magic lanterns were variously employed to give the world an intelligible and manageable design. Drawing on a range of materials—philosophical, scientific and religious literature, visual arts, correspondence, poems, pamphlets, and illustrations—this provocative and inventive work expands our concept of the early media of projection, revealing how they spoke to early modern thinkers, and shaped a new, speculative concept of the world.

Holy Digital Grail
A Medieval Book on the Internet
Michelle R. Warren
Medieval books that survive today have been through a lot. In this book, Michelle R. Warren tells the story of one such manuscript—an Arthurian romance with textual origins in twelfth-century England now diffused across the twenty-first century internet. In the process, she uncovers a practice of “tech medievalism” that weaves through the history of computing since the mid-twentieth century; metaphors indebted to King Arthur and the Holy Grail are integral to some of the technologies that now sustain medieval books on the internet. Situated at the intersections of the digital humanities, library sciences, literary history, and book history, *Holy Digital Grail* offers new ways to conceptualize authorship, canon formation, and the definition of a “book.”

“Deeply learned, self-reflective and ethical, and a really good read. Holy Digital Grail represents a lifetime’s worth of thinking deeply.” —Siân Echard, University of British Columbia

Hamas Contained
The Rise and Pacification of Palestinian Resistance
Tareq Baconi
Hamas rules Gaza and the lives of the two million Palestinians who live there. Demonstrized in media and policy debates, various accusations and critical assumptions have been used to justify extreme military action against Hamas. The reality of Hamas is, of course, far more complex. Neither a democratic political party nor a terrorist group, Hamas is a multifaceted liberation organization, one rooted in the nationalist claims of the Palestinian people. Drawing on interviews with organization leaders, as well as publications from the group, Tareq Baconi maps Hamas’s thirty-year transition from fringe military resistance towards governance. He breaks new ground in questioning the conventional understanding of Hamas and shows how the movement’s ideology ultimately threatens the Palestinian struggle and, inadvertently, its own legitimacy.

Confined
From the Grounds Up
Building an Export Economy in Southern Mexico
Casey Marina Lurtz
In the late nineteenth century, Latin American exports boomed. From Chihuahua to Patagonia, producers sent industrial fibers, tropical fruits, and staple goods across oceans to satisfy the ever-increasing demand from foreign markets. In southern Mexico’s Soconusco district, the coffee trade would transform rural life. Alongside plantation owners and foreign investors, a dense but little-explored web of small-time producers, shopowners, and laborers played key roles in the rapid expansion of export production. A regional history of the Soconusco as well as a study in commodity capitalism, From the Grounds Up places indigenous and mestizo villagers, migrant workers, and local politicians at the center of our understanding of the development of Latin America’s export-driven economy during the first era of globalization.

“A remarkable contribution to our understanding of capitalist development in Mexico through the last 150 years.”

Oilcraft
The Myths of Scarcity and Security That Haunt U.S. Energy Policy
Robert Vitalis
There is a conventional wisdom about oil—that US military presence in the Gulf guarantees access to this strategic resource; that the “special” relationship with Saudi Arabia is necessary to stabilize an otherwise volatile market; and that these assumptions provide Washington enormous leverage. Except, the conventional wisdom is wrong. Robert Vitalis debunks the myths to reveal “oilcraft,” a line of magical thinking closer to witchcraft than statecraft. He exposes the suspect fears of scarcity and conflict, and investigates the significant geopolitical impact of these false beliefs. In particular, Vitalis shows how we can reconsider the question of the US–Saudi relationship. Freeing ourselves from the spell of oilcraft won’t be easy—but the benefits make it essential.

“Vitalis has once again revealed the question of the US–Saudi relationship. Freeing ourselves from the spell of oilcraft won’t be easy—but the benefits make it essential.”

Edited by Thomas S. Mullaney
In the past decade alone, more than ten million corpses have been exhumed and reburied across the Chinese landscape. In this digital volume, three historians of China, Jeffrey Snyder-Reinke, Christian Henriot, and Thomas S. Mullaney, chart out the history of China’s rapidly shifting deathscape. Each essay grapples with a different dimension of grave relocation and burial reform in China over the past three centuries.
