Tyranny Comes Home *The Domestic Fate of U.S. Militarism*

Christopher J. Coyne and
Abigail R. Hall

Many Americans believe that foreign military intervention is central to protecting our domestic freedoms. But Christopher J. Coyne and Abigail R. Hall urge engaged citizens to think again. Under certain conditions, policies, tactics, and technologies that are used overseas in the name of national defense are re-imported to America, changing the national landscape and increasing the extent to which we live in a police state.

Coyne and Hall examine this pattern—which they dub “the boomerang effect”—considering a variety of rich cases that include the rise of state surveillance, the militarization of domestic law enforcement, the expanding use of drones, and torture in U.S. prisons. Synthesizing research and applying an economic lens, they develop a generalizable theory to predict and explain a startling trend. *Tyranny Comes Home* unveils a new aspect of the symbiotic relationship between foreign interventions and domestic politics.

The High Cost of Good Intentions *A History of U.S. Federal Entitlement Programs*

John F. Cogan

Federal entitlement programs are strewn throughout the pages of U.S. history, springing from the noble purpose of assisting people who are destitute through no fault of their own. Yet as federal entitlement programs have grown, so too have their inefficiency and their cost.

The High Cost of Good Intentions is the first comprehensive history of these federal entitlement programs. Combining economics, history, political science, and law, John F. Cogan reveals how the creation of entitlements brings forth a steady march of liberalizing forces that cause entitlement programs to expand. This process is as visible in the eighteenth and nineteenth centuries as in the present day. His work provides a unifying explanation for the evolutionary path that nearly all federal entitlement programs have followed over the past 200 years, tracing both their shared past and the financial risks they pose for future generations.

After the Rise and Stall of American Feminism

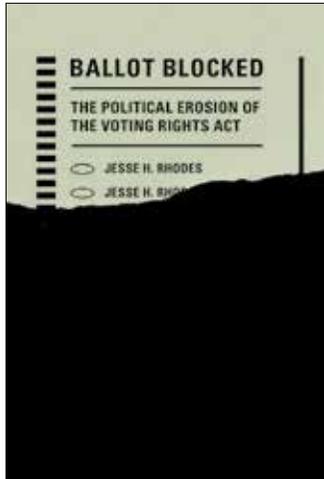

Taking Back a Revolution

Lynn S. Chancer

Across the decades, the feminist movement brought about significant progress on workplace discrimination, reproductive rights, and sexual assault. Yet, the proverbial million-dollar question remains: why is there still so much to be done?

With this book, Lynn S. Chancer takes stock of the American feminist movement and engages with a new burst of feminist activism. She articulates four common causes—advancing political and economic equality, allowing intimate and sexual freedom, ending violence against women, and expanding the cultural representation of women—considering each in turn to assess what has been gained (or not). It is around these shared concerns, Chancer argues, that we can continue to build a vibrant and expansive feminist movement. Ultimately, this book is about not only redressing problems, but also reasserting a future for feminism and its enduring ability to change the world.

Ballot Blocked

The Political Erosion of the Voting Rights Act

Jesse H. Rhodes

Over the past five decades, both Democrats and Republicans in Congress have consistently voted to expand the protections offered by the Voting Rights Act. And yet, the administration of the VRA has become more fragmented, and judicial interpretation of its terms has become much less generous.

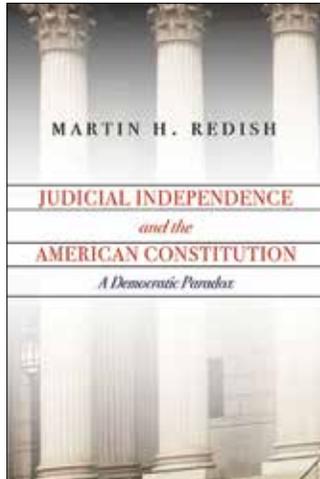

Ballot Blocked argues that conservatives adopt a paradoxical strategy in which they acquiesce to expansive voting rights protections in Congress (where decisions are visible and easily traceable) while simultaneously narrowing the scope of federal enforcement via administrative and judicial maneuvers (which are less visible and harder to trace). Over time, this strategy has enabled a conservative Supreme Court to exercise preponderant influence over the scope of federal enforcement.

“Bold and richly detailed. Rhodes provides timely and crucial new insights.”

—Vesla Weaver,
Yale University

Judicial Independence and the American Constitution

A Democratic Paradox

Martin H. Redish

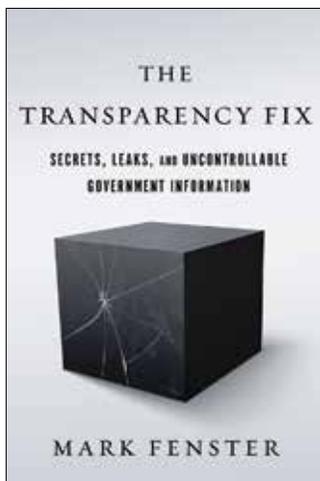

The Framers of the American Constitution established a judicial branch to protect and enforce constitutional limits. They recognized that, paradoxically, only a counter-majoritarian judicial branch can ensure the continued vitality of our representational government.

This paradox of American democracy has been challenged and often ignored by office holders and legal scholars. Martin H. Redish defends the centrality of these special protections of judicial independence. He explains how the nation's system of counter-majoritarian constitutionalism cannot survive absent the vesting of final powers of constitutional interpretation and enforcement in the one branch of government expressly protected from direct political accountability: the judicial branch.

“Ignore Redish at your peril. This well-written and accessible book is sure to be oft-cited for decades.”

The Transparency Fix
Secrets, Leaks, and Uncontrollable Government Information

Mark Fenster

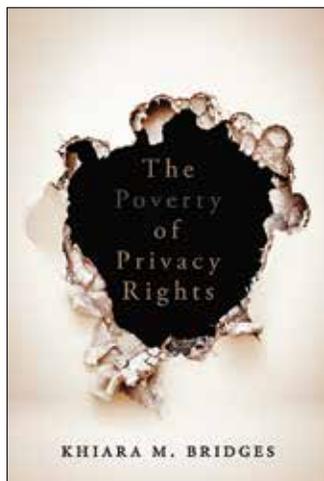

Government information cannot be controlled. *The Transparency Fix* asserts that both transparency movements and secrecy advocates hold the mistaken belief that government information can be released or kept secure on command.

In truth, the world did not end because Julian Assange, WikiLeaks, and Edward Snowden released classified information. But nor was there a significant political change. Using a variety of examples to examine how government information actually flows, Mark Fenster describes how the legal regime's tenuous control over state information belies the promise and peril of transparency. He challenges us to confront the implausibility of controlling government information despite our obsession with transparency and secrecy.

"No one has done more than Mark Fenster to challenge the premises and policies of the open government movement. This book will be foundational in critical transparency studies."

The Poverty of Privacy Rights
Khiara M. Bridges

The Poverty of Privacy Rights makes a simple, controversial argument: Poor mothers in America are deprived of the right to privacy. The U.S. Constitution is supposed to bestow rights equally. Yet the poor are subject to invasions of privacy that are gross demonstrations of governmental power. Khiara M. Bridges investigates poor mothers' experiences with the state—both when they receive public assistance and when they do not. Presenting a holistic view of how the state intervenes in all facets of poor mothers' privacy, Bridges turns popular thinking on its head, arguing that these women simply do not have familial, informational, and reproductive privacy rights. Further, she asserts that until we disrupt the cultural narratives that equate poverty with immorality, nothing will change.

"This book calls us to rethink the very meaning of the right to privacy and to end the unjust and unsupportable moral condemnation of poverty."

The Balance Gap
Working Mothers and the Limits of the Law

Sarah Cote Hampson

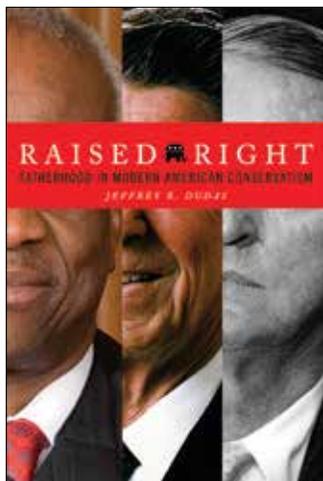

In recent decades, laws and workplace policies have emerged that seek to address the “balance” between work and family. Millions of women in the U.S. take time off when they give birth or adopt a child, making use of “family-friendly” laws and policies.

The Balance Gap traces the paths individual women take in understanding and invoking work/life balance laws and policies. Conducting in-depth interviews in two distinctive workplace settings—public universities and the U.S. military—Sarah Cote Hampson uncovers how women navigate the laws and the unspoken cultures of their institutions. As Hampson shows, these policies and women's abilities to understand and utilize them have fallen short of alleviating the tensions women experience.

"Elegantly written and timely, The Balance Gap is a rigorous call to action in transforming how we view the ideal mother and the ideal worker."

Raised Right
*Fatherhood in Modern
American Conservatism*

Jeffrey R. Dudas

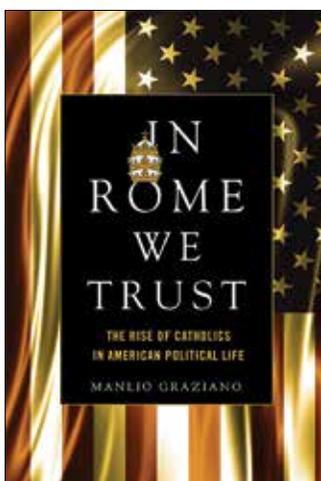

What, and who, holds together the modern conservative movement's corporate interests, small-government libertarians, social traditionalists, and evangelical Christians? *Raised Right* pursues an answer through a study of three iconic figures: *National Review* editor William F. Buckley, Jr., President Ronald Reagan, and Supreme Court Justice Clarence Thomas. Jeffrey R. Dudas identifies a "paternal rights discourse"—arguments about fatherhood and rights that permeate the men's personal lives and political visions. Each argued that paternal discipline produced autonomous citizens worthy and capable of self-governance, which provided the cohesive agent for an entire movement, uniting its celebration of its "founding fathers," past and present, constitutional and biological.

"I began this book a skeptic and finished it a convert. A true tour de force."

—Malcolm M. Feeley,
University of California, Berkeley

In Rome We Trust
*The Rise of Catholics in
American Political Life*

Manlio Graziano

The "Catholicization" of the United States is a recent phenomenon and was particularly prominent in the Obama administration. Over one-third of cabinet members, the Vice President, the White House Chief of Staff, the heads of Homeland Security and the CIA, the director and deputy director of the FBI, and the Chairman of the Joint Chiefs of Staff were all Roman Catholic. Challenging received wisdom that the American Catholic Church is in crisis and that the political religion in the United States is Evangelicalism, Manlio Graziano provides an engaging account of the tendency of Catholics to play an increasingly significant role in American politics, as well as the rising role of American prelates in the Roman Catholic Church.

"This fascinating and astonishingly neglected subject is of immense importance, and I can think of no one better positioned than Manlio Graziano to treat it in all its complexity."

Presidential Leverage
Presidents, Approval, and the American State

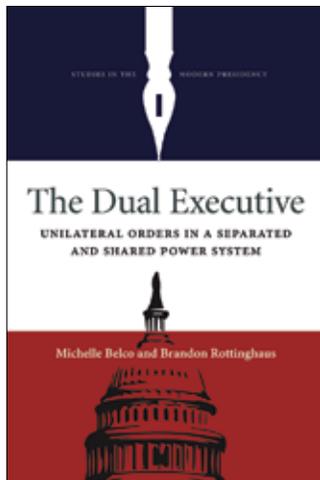

Daniel E. Ponder

For scholars, pundits, the public, and presidents themselves, presidential approval is an evergreen subject. Its actual impact, however, is often unclear: all too frequently approval is reported in a vacuum, dissociated from the American state writ large. *Presidential Leverage* reaffirms the importance of this contested metric. By situating approval within the context of public trust in government, Daniel E. Ponder reveals how approval shapes presidential strategies for governing, providing a useful measure of the president's place in the political system. Ponder examines this contextualized approval from John F. Kennedy's administration through Barack Obama's, showing how it has shaped presidential capacity and autonomy, agenda setting, landmark legislation, and unilateral action.

"Engaging and thoughtful, rich in its historical inquiry and contemporary relevance."

—Rodney Hero,
Arizona State University and
President, American Political
Science Association (2014-15)

The Dual Executive
Unilateral Orders in a Separated and Shared Power System

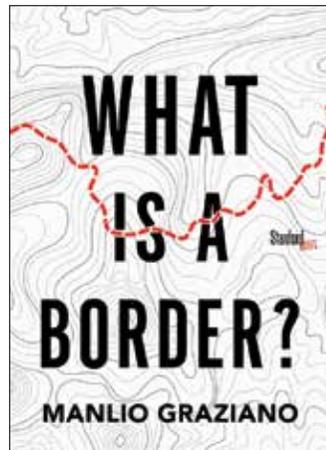

**Michelle Belco and
Brandon Rottinghaus**

Popular perception holds that presidents resort to unilateral orders to promote an agenda and head off unfavorable legislation. Little research, however, has considered the diverse circumstances in which such orders are issued. *The Dual Executive* reinterprets how and when presidents use unilateral power by illuminating the dual roles of the president. Drawing from an original data set of over 5,000 executive orders and proclamations from the Franklin D. Roosevelt to the George W. Bush administrations, this book situates unilateral orders within the broad scope of executive-legislative relations. Michelle Belco and Brandon Rottinghaus recast the executive as both an aggressive "commander" and a cooperative "administrator" who uses unilateral power not only to circumvent Congress, but also to support and facilitate its operations.

"Belco and Rottinghaus provide fresh insight into the use and limits of unilateral power."

—Douglas L. Kriner,
Boston University

What Is a Border?

Manlio Graziano

The fall of the Berlin Wall, symbol of the bipolar order that emerged after World War II, seemed to inaugurate an age of ever fewer borders. The liberalization and integration of markets, the creation of vast free-trade zones, and the birth of a new political and monetary union in Europe, for instance, all appeared to point in that direction. Only thirty years later, though, boundaries and borders are expanding in number and being reintroduced in places where they had virtually been abolished. Is this an out-of-step, deceptive last gasp of national sovereignty or the victory of the weight of history over the power of place? The fact that borders have made a comeback, warns Manlio Graziano, does not mean that they will resolve any problems. His geopolitical history and analysis draws our attention to the ground shifting under our feet in the present and allows us to speculate on what might happen in the future.

Anchor Babies and the Challenge of Birthright Citizenship

Leo R. Chavez

Birthright citizenship has a deep and contentious history in the United States, one often hard to square in a country that prides itself on being “a nation of immigrants.” Recently, a provocative and decidedly more offensive term than birthright citizenship has emerged: “anchor babies.” Leo R. Chavez counters the often-hyperbolic claims surrounding this term. He considers how it is used as a political dog whistle, how changes in the legal definition of citizenship have affected the children of immigrants over time, and, ultimately, how U.S.-born citizens still experience trauma if they live in families with undocumented immigrants. By examining this pejorative term in its political, historical, and social contexts, Chavez calls upon us to exorcise it from public discourse and work toward building a more inclusive nation.

Living Emergency
Israel's Permit Regime in the Occupied West Bank

Yael Berda

In 1991, the Israeli government introduced emergency legislation canceling the general exit permit that allowed Palestinians to enter Israel. The directive, effective for one year, has been reissued annually ever since, turning the Occupied Territories into a closed military zone. Today, Israel's permit regime for Palestinians is one of the world's most extreme and complex apparatuses for population management. *Living Emergency* brings readers inside the permit regime, and offers a first-hand account of how the Israeli secret service, government, and military civil administration control the Palestinian population. Through numerous interviews, Yael Berda reconstructs the institutional framework of the labyrinthine permit regime, illuminating both its overarching principles and its administrative practices.

BRICS or Bust?
Escaping the Middle-Income Trap

Hartmut Elsenhans and Salvatore Babones

Once among the fastest developing economies, growth has slowed or stalled in Brazil, Russia, India, China, and South Africa. What policies can governments enact to jump-start the rise of these middle-income countries? *BRICS or Bust?* argues that economic catch-up requires investment in the productivity of ordinary citizens. Diverging from the popular narrative of increased liberalization, it calls for direct government investment in human infrastructure, policies that increase wages and the bargaining power of labor, and the strategic use of exchange rates to encourage export-led growth. Examining barriers to implementation, Hartmut Elsenhans and Salvatore Babones find that the main obstacle to such reforms is an absence of political will, stemming from closely guarded elite privilege under the current laws.

Hamas Contained
*The Rise and Pacification of
Palestinian Resistance*

Tareq Baconi

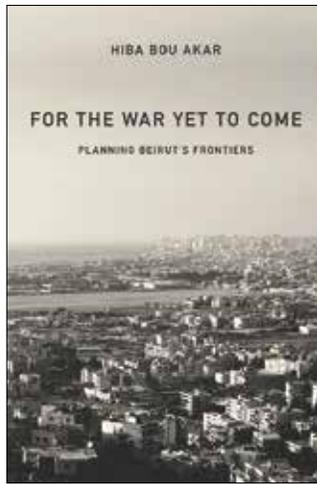

Various accusations and critical assumptions have been used to justify extreme military action against Hamas. The reality is, of course, far more complex. Neither a terrorist group nor a democratic political party, Hamas is a multifaceted liberation organization rooted in the nationalist claims of the Palestinian people. *Hamas Contained* offers the first history of the group on its own terms. Drawing on interviews with organization leaders, as well as publications from the group, that Tareq Baconi maps Hamas's thirty-year transition from fringe military resistance towards governance. He shows how the movement's ideology threatens the Palestinian struggle and, inadvertently, its own legitimacy.

"Ground-breaking, rigorously researched, and strikingly fair-minded, Hamas Contained is essential reading."

For the War Yet to Come
Planning Beirut's Frontiers

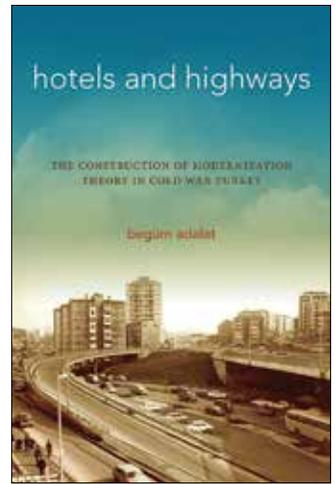

Hiba Bou Akar

Beirut is a city divided. Following the Green Line of the civil war, dividing the Christian east and the Muslim west, today hundreds of such lines dissect the city. With unclear state structures and outsourced public processes, urban planning has become a contest between religious-political organizations and profit-seeking developers. *For the War Yet to Come* examines urban planning in three neighborhoods of Beirut's south-eastern peripheries, revealing how these areas have been developed to reproduce poverty, displacement, and urban violence. Hiba Bou Akar argues these neighborhoods are arranged according to the logic of "the war yet to come," playing on fears and differences, rumors of war, and paramilitary strategies to organize everyday life.

"Fascinating, theoretically astute, and empirically rich, For the War Yet to Come enriches our understanding of fragile cities in the Middle East and beyond."

Hotels and Highways
*The Construction of Modernization
Theory in Cold War Turkey*

Begüm Adalet

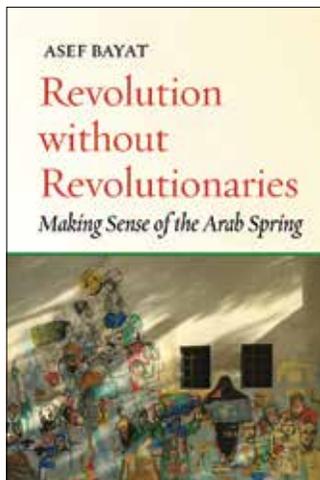

The early decades of the Cold War presented seemingly boundless opportunity for the construction of "laboratories" of American society abroad. With this book, Begüm Adalet reveals how Turkey became both the archetypal model of modernization and an active partner for its enactment. In tracking the growth and transmission of modernization as a theory and in practice in Turkey, *Hotels and Highways* offers not only a specific history of a postwar development model that continues to influence our world, but also a widely relevant consideration of how theoretical debates ultimately take shape in concrete situations.

"Hotels and Highways gives a clear understanding how U.S. hegemony was conceived and implemented in the aftermath of World War II. Anybody interested in twentieth-century experiences of modernity and U.S. power in the Middle East will need to read this book."

—Resat Kasaba,
University of Washington

Revolution without Revolutionaries
Making Sense of the Arab Spring
Asef Bayat

The revolutionary wave that swept the Middle East in 2011 was marked by spectacular mobilization. However, it has caused limited shifts in structures of power, leaving much of the old political and social order intact. In this book, Asef Bayat uncovers why this occurred and what made these uprisings so distinct from those that came before.

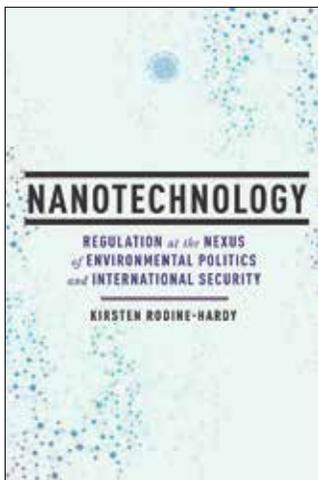

Revolution without Revolutionaries is both a history of the Arab Spring and a history of revolution writ broadly. Setting the 2011 uprisings side by side with the revolutions of the 1970s, particularly the Iranian Revolution, Bayat reveals a profound global shift in the nature of protest: protestors call for reform rather than fundamental transformation.

"Asef Bayat is in the vanguard of a subtle and original theorization of social movements and social change in the Middle East. Essential reading."

Nanotechnology
Regulation at the Nexus of Environmental Politics and International Security
Kirsten Rodine-Hardy

Twenty years ago, scientists and policymakers proclaimed that nanotechnology would cure cancer, remediate environmental destruction, and boost the economy. Over sixty countries created national nanotechnology initiatives, yet some countries succeeded more than others in capitalizing on these promises.

The innovation imbalance can be explained by the fact that policy entrepreneurs act through global diffusion channels and national regulatory regimes. Kirsten Rodine-Hardy establishes a framework to analyze trends in policies, markets, and regulations. Comparative case studies reveal the U.S.'s market-oriented and decentralized approach, the EU's government-led and precautionary approach, and developing nations' state-led—yet fragmented—approach. The book transforms our understanding of the nexus of global markets, environment, and security.

Globalization Under and After Socialism
The Evolution of Transnational Capital in Central and Eastern Europe
Besnik Pula

The post-communist states of Central and Eastern Europe have gone from being among the world's most closed, autarkic economies to some of the most export-oriented and globally integrated. Besnik Pula reaches deep into the region's history and comparatively examines its long-run industrial development to explain this shift. In the 1970s, Central and Eastern European socialist leaders intensified engagements with the capitalist West, which challenged the Stalinist developmental model in favor of exports and transnational integration. A new reliance on exports launched the integration of Eastern European industry into value chains that cut across the East-West political divide. This book enriches our understanding of a regional shift while also explaining the distinct international roles that Central and Eastern European states have assumed in the globalized twenty-first century.

Self-Regulation and Human Progress
How Society Gains When We Govern Less

Evan Osborne

Most of us are familiar with free-market competition: the idea that society and the economy benefit when people are left to self-regulate, testing new ideas in pursuit of profit. Less known is the fact that this theory arose after arguments for the scientific method and freedom of speech had gone mainstream—and that all three share a common basis. It was long thought that society was better left to organize itself through free markets as opposed to political institutions. But, over the twentieth century, we became less confident in the notion of a self-regulating socioeconomy. Evan Osborne traces the rise and fall of this once-popular concept. He argues that as society becomes more complex, self-regulation becomes more efficient and can once again serve our economy well.

“Osborne’s argument and ability to connect disparate tidbits expanded my own knowledge a great deal.”

—Gary Wolfram,
 Hillsdale College

Financializing Poverty
Labor and Risk in Indian Microfinance

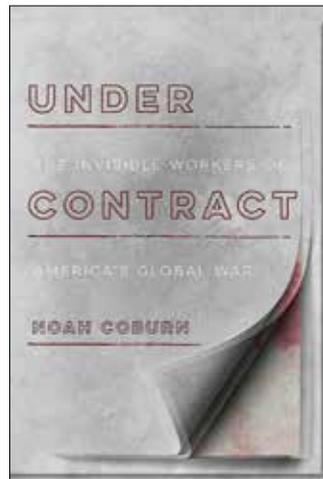

Sohini Kar

Microfinance is the business of giving small, collateral-free loans to poor borrowers that are paid back in frequent intervals with interest. While for-profit microfinance institutions (MFIs) promise social and economic empowerment, they have mainly succeeded at enfoldng the poor—especially women—into the vast circuits of global finance. *Financializing Poverty* ethnographically examines how the emergence of MFIs has allowed financial institutions in the city of Kolkata, India, to capitalize on the poverty of its residents. Sohini Kar shows that rigid forms of credit risk management used by MFIs reproduce the very inequality the loans are meant to alleviate. Moreover, she argues, the use of life insurance to manage high mortality rates of poor borrowers has led to the collateralization of life itself.

“Kar has beautifully rendered much hard-won and illuminating ethnographic data into compelling prose.”

Under Contract
The Invisible Workers of America's Global War

Noah Coburn

War is one of the most lucrative job markets for an increasingly global workforce. Most of the work on American bases has been outsourced to private firms that then contract out individual jobs, often to the lowest bidder. An “American” base in Afghanistan or Iraq will be staffed with workers from places like Sri Lanka, Bangladesh, the Philippines, Turkey, Bosnia, and Nepal: so-called “third-country nationals.”

Noah Coburn traces this unseen workforce across seven countries, following the workers’ often zigzagging journey to war. He confronts the varied conditions third-country nationals encounter, ranging from near slavery to more mundane forms of exploitation. *Under Contract* unspools a complex global web of how modern wars are fought and supported, narrating war stories unlike any other. Coburn’s experience forces readers to reckon with the moral questions of a hidden global war-force and the costs being shouldered by foreign nationals in our name.

Challenged Hegemony
The United States, China, and Russia in the Persian Gulf

Steve A. Yetiv and Katerina Oskarsson

Few issues in international affairs and energy security animate thinkers more than the classic topic of hegemony, and the case of the Persian Gulf is particularly fertile ground for considering this concept. Steve A. Yetiv and Katerina Oskarsson offer a panoramic study of hegemony and foreign powers in the Persian Gulf, presenting the most comprehensive, data-driven portrait to date of their evolving relations.

The authors argue that the United States has become hegemonic in the Persian Gulf, ultimately protecting oil security for the entire global economy. Through an analysis of official and unofficial diplomatic relations, trade statistics, military records, and more, they provide a detailed account of how U.S. hegemony and oil security have grown in tandem, as, simultaneously, China and Russia have increased their political and economic presence.

The Power of Economists within the State

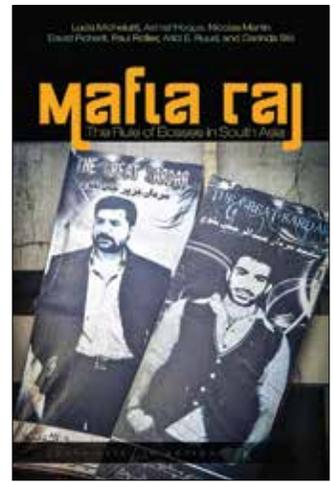

Johan Christensen

The spread of market-oriented reforms has been one of the major political and economic trends of the late twentieth and early twenty-first centuries. Governments have adopted policies that have led to deregulation; yet, some countries have embraced these policies more than others. Johan Christensen examines one major contributor to this disparity: the entrenchment of U.S.-trained, neoclassical economists in political institutions the world over. While previous studies have highlighted the role of political parties and production regimes, Christensen uses comparative case studies of New Zealand, Ireland, Norway, and Denmark to show how the influence of economists affected the extent to which each nation adopted market-oriented tax policies. He finds that, in countries where economic experts held powerful positions, neoclassical economics broke through with greater force.

“A finely tuned and deeply knowledgeable account. A page-turner on tax policy is surely an event to celebrate.”

Mafia Raj

The Rule of Bosses in South Asia

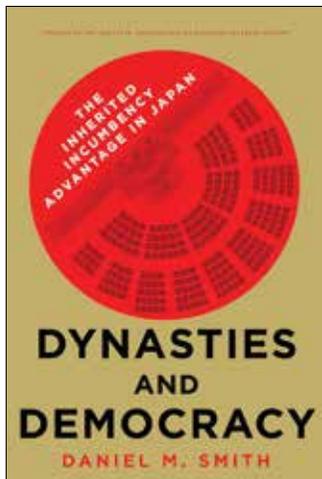

Lucia Michelutti, Ashraf Hoque, Nicolas Martin, David Picherit, Paul Rollier, Arild E. Ruud, and Clarinda Still

“Mafia” has become an indigenous South Asian term. Like Italian mobsters, the South Asian “gangster politicians” are known for inflicting brutal violence while simultaneously upholding vigilante justice—inspiring fear and fantasy. But the term also refers to the diffuse spheres of crime, business, and politics operating within a shadow world that is popularly referred to as the rule of the mafia, or “Mafia Raj.”

Through intimate stories of the lives of powerful and aspiring bosses in India, Pakistan, and Bangladesh, this book illustrates their personal struggles for sovereignty as they climb the ladder of success. Ethnographically tracing the particularities of the South Asian case, the authors theorize what they call “the art of bossing,” providing nuanced ideas about crime, corruption, and the lure of the strongman across the world.

Dynasties and Democracy
The Inherited Incumbency Advantage in Japan

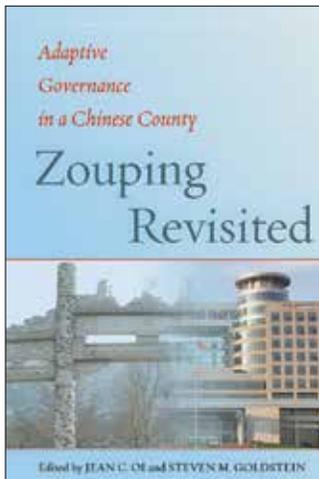

Daniel M. Smith

Although democracy is, in principle, the antithesis of dynastic rule, families with multiple members in elective office continue to be common around the world. In most democracies, the proportion of such “democratic dynasties” declines over time, and rarely exceeds ten percent of all legislators. Japan is a startling exception, with over a quarter of all legislators in recent years being dynastic. In *Dynasties and Democracy*, Daniel M. Smith sets out to explain when and why dynasties persist in democracies, and why their numbers are only now beginning to wane in Japan—questions that have long perplexed regional experts. His findings extend far beyond Japan, shedding light on the causes and consequences of dynastic politics for democracies around the world.

“It is hard to think of a sharper evaluation of the effects of political institutions on the quality and nature of democratic competition.”

Zouping Revisited
Adaptive Governance in a Chinese County

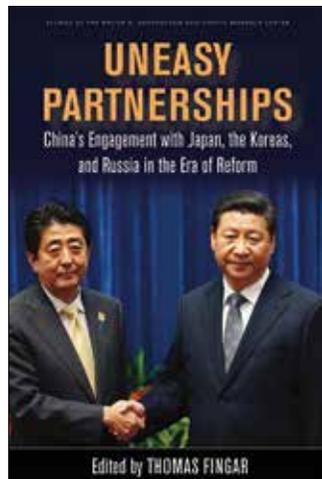

Edited by Jean C. Oi and Steven Goldstein

China has undergone dramatic change in its economic institutions in recent years, but surprisingly little change politically. Somehow, the political institutions seem capable of governing a vastly more complex market economy and a rapidly changing labor force. One possible explanation is that within the old organizational molds there have been subtle but profound changes to the ways these governing bodies actually work. This book takes the local government of Zouping County and finds that it has been able to evolve significantly through ad hoc bureaucratic adaptations and accommodations that drastically change the operation of government institutions. The picture that emerges is one of institutional agility and creativity as a new form of resilience within an authoritarian regime.

“Grounded in the soil of rural China, this book examines the startling ways old institutional structures are re-purposed to perform new functions.”

—David M. Lampton,
Johns Hopkins University

UNEASY PARTNERSHIPS
China's Engagement with Japan, the Koreans, and Russia in the Era of Reform

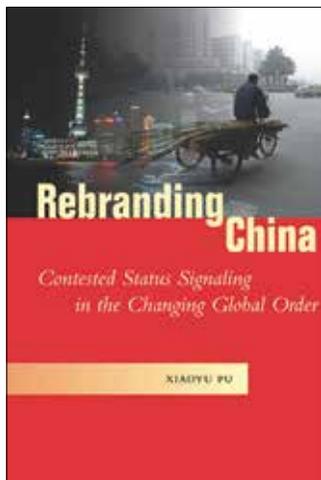

Edited by Thomas Fingar

Uneasy Partnerships presents the analysis and insights of practitioners and scholars who have shaped and examined China's interactions with key Northeast Asian partners—Japan, the Koreans, and Russia. Using the same empirical approach employed in the companion volume, *The New Great Game*, this text analyzes the perceptions, priorities, and policies of China and its partners to explain why dyadic relationships evolved as they have during China's rise. The findings are used to identify patterns and trends and to develop a framework that can be used to illuminate and explain Beijing's engagement with the rest of the world.

“A masterful examination of China's complex interactions with its immediate neighbors. The fine-grained strands of this complex story are woven into a compelling macro-level analysis of Northeast Asia that will be applauded by experts and generalists alike.”

Rebranding China

Contested Status Signaling in the Changing Global Order

Xiaoyu Pu

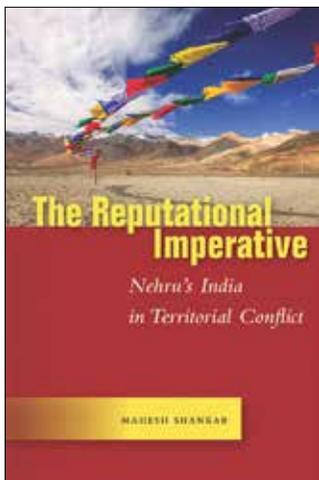

China is intensely conscious of its status, at home and abroad. Contradictory posturing as a fragile developing country and a nascent global power makes decoding China's foreign policy a challenge, generating uncertainty in many parts of the world. Using the metaphor of rebranding to understand China's varying displays of status, Xiaoyu Pu analyzes a rising China's challenges and dilemmas on the global stage.

Rebranding China demystifies how the state represents its global position by analyzing recent military transformations, regional diplomacy, and international financial negotiations. Drawing on a sweeping body of research, including original Chinese sources and interdisciplinary ideas from sociology, psychology, and international relations, this book puts forward an innovative framework for interpreting China's foreign policy.

"This is a must-read for anyone interested in China's foreign relations and China's domestic political development in the reform era."

The Reputational Imperative

Nehru's India in Territorial Conflict

Mahesh Shankar

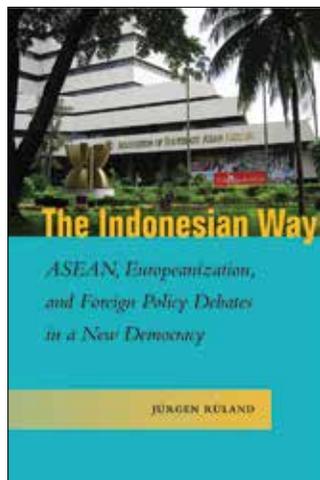

India's first prime minister, Jawaharlal Nehru, left behind a legacy of both great achievements and surprising defeats. Most notably, he failed to resolve the Kashmir dispute with Pakistan and the territorial conflict with China. Mahesh Shankar offers a compelling and novel understanding of these puzzling foreign policy missteps: reputation. India's investment in its international image powerfully shaped the state's negotiation and bargaining tactics during this period.

The Reputational Imperative proves not only that reputation is a significant driver in these conflicts but also that it's about more than simply looking good on the global stage. Shankar answers longstanding questions about Nehru's territorial negotiations and provides a deeper understanding of how a state's global image works. He highlights the pivotal—yet often overlooked—role reputation can play in a broad global security context.

"An enlightening and unbiased read."

The Indonesian Way

ASEAN, Europeanization, and Foreign Policy Debates in a New Democracy

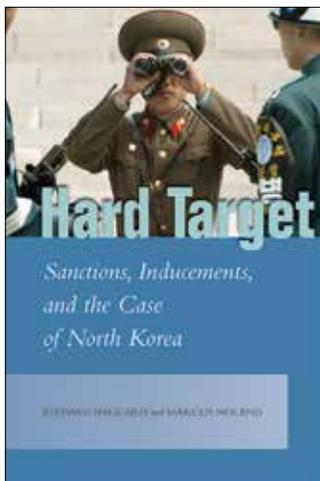

Jürgen Rüländ

On December 31, 2015, the ten-member Association of Southeast Asian Nations (ASEAN) founded the ASEAN Community (AC). Political commentators and media outlets, however, greeted its establishment with little fanfare. Implicitly and explicitly, they suggested that the AC was only the beginning: Southeast Asia, they seemed to say, was taking its first steps on a linear process of unification that would converge on the model of the European Union. In *The Indonesian Way*, Jürgen Rüländ challenges this previously unquestioned diffusion of European norms. Focusing on the reception of ASEAN in Indonesia, Rüländ traces how foreign policy stakeholders have responded to calls for ASEAN's Europeanization, ultimately fusing them with their own distinctly Indonesian form of regionalism.

"An essential study of comparative regionalism and Indonesia's role in the ASEAN Charter."

Hard Target

Sanctions, Inducements, and the Case of North Korea

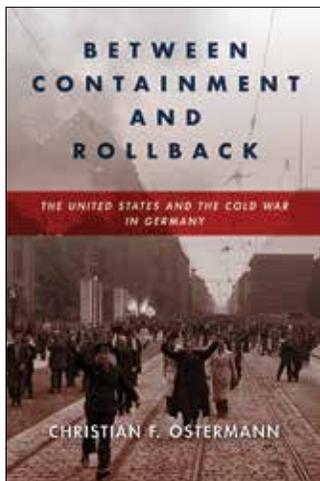

Stephan Haggard and
Marcus Noland

This book captures the effects of sanctions and inducements on North Korea and reconstructs the role of economic incentives around the country's nuclear program. Stephan Haggard and Marcus Noland draw on an array of evidence to show the reluctance of the North Korean leadership to weaken its grip on foreign economic activity. They argue that inducements have limited effect on the regime, and instead urge policymakers to think in terms of gradual strategies. *Hard Target* connects economic statecraft to the marketization process to understand North Korea and addresses a larger debate over the merits and demerits of “engagement” with adversaries.

“An innovative study of the evolving political economy of North Korea. Amid an increasing application of sanctions, Hard Target contributes much needed sophistication and nuance to over-simplified debates about dealing with North Korea.”

Between Containment and Rollback

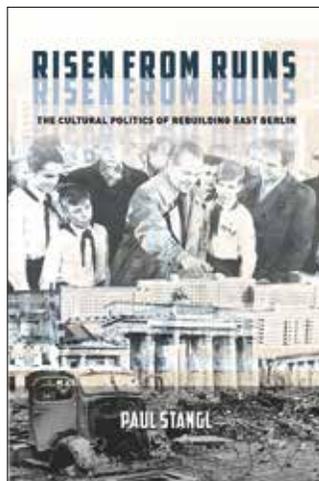

The United States and the Cold War in Germany

Christian Ostermann

In the aftermath of World War II, American diplomats and policymakers turned to the task of rebuilding Europe while keeping Communism at bay, confronting a divided Germany. Based on recently declassified documents from American, Russian, and German archives, this book tells the story of U.S. policy toward East Germany from 1945 to 1953. As the American approach shifted between the policy of “containment” and more active “rollback” of Communist power, the Truman and Eisenhower administrations worked to undermine Soviet-backed Communist rule without compromising economic and nation-building interests in West Germany. There was a darker side to American policy in East Germany: covert operations, propaganda, and psychological warfare. This international history tracks relations between East German and Soviet Communists, providing new perspectives on U.S. foreign policy as Cold War tensions coalesced.

Risen from Ruins

The Cultural Politics of Rebuilding East Berlin

Paul Stangl

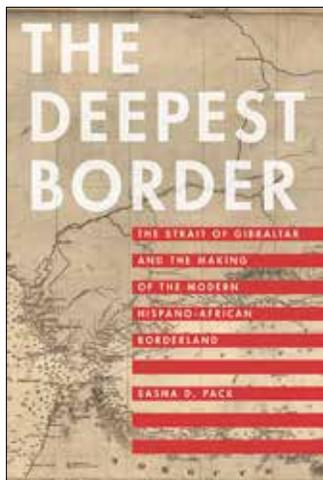

This book combines political analysis with spatial and architectural history to examine the urban landscape of East Berlin from the end of World War II until the construction of the Berlin Wall. Following the destruction of the war, decision makers balanced historic preservation against the opportunity to model the Socialist future and reject the example of the Nazi dictatorship through architecture and urban design. The political and ideological agenda of East German elites and the ruling Socialist Unity Party (SED) had a profound effect on the built environment. Paul Stangl's analysis expands our understanding of urban planning, historic preservation, and Socialist Realism in East Berlin.

“A comprehensive analysis of the politics of urban space in East Berlin. A book of great breadth and depth, it deserves a wide readership among scholars of memory, urban space, and Soviet Communism.”

The Deepest Border

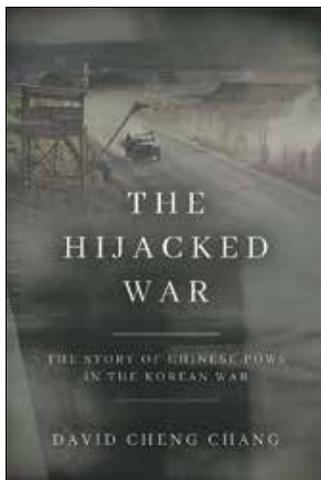

The Strait of Gibraltar and the Making of the Modern Hispano-African Borderland

Sasha D. Pack

The Deepest Border tells the story of how a borderland society formed around the Strait of Gibraltar, bringing historical perspective to one of the contemporary world's critical border zones. Sasha D. Pack draws out connections often invisible to national and mono-imperial histories. In conceptualizing the Strait of Gibraltar region as a borderland, Pack reconsiders the region's major tensions and conflicts, including the Rif Rebellion, the Spanish Civil War, the European phase of World War II, the colonization and decolonization of Morocco, and the ongoing controversies over the exclaves of Gibraltar, Ceuta, and Melilla. Integrating these threads into a long history of the region, *The Deepest Border* speaks to broad questions about how sovereignty operates on the "periphery," how borders are constructed and maintained, and the enduring legacies of imperialism and colonialism.

The Hijacked War

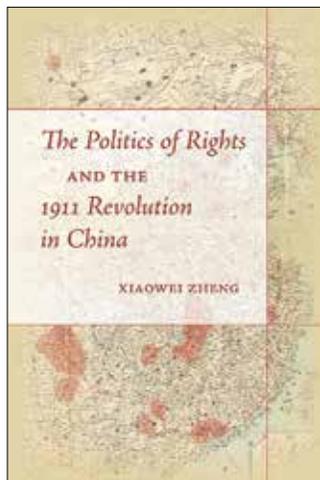

The Story of Chinese POWs in the Korean War

David Cheng Chang

The Korean War lasted for three years, one month, and two days—but armistice talks occupied more than two of those years, as 14,000 Chinese prisoners of war refused to return to Communist China, effectively hijacking the negotiations of world leaders at a pivotal moment in Cold War history. In *The Hijacked War*, David Cheng Chang vividly portrays the experiences of Chinese prisoners in the dark, cold, and damp tents of Kojé and Cheju islands in Korea and how their decisions derailed the high politics being conducted in Washington, Moscow, and Beijing. Drawing on newly declassified archival materials from China, Taiwan, and the United States and interviews with surviving Chinese and North Korean prisoners of war, Chang depicts the struggle over prisoner repatriation that dominated the second half of the Korean War—and changed the course of the Cold War in East Asia—in the prisoners' own words.

The Politics of Rights and the 1911 Revolution in China

Xiaowei Zheng

China's 1911 Revolution was a momentous political transformation. Its leaders, however, were not rebellious troublemakers on the periphery of imperial order. On the contrary, they were a powerful political and economic elite deeply entrenched in local society. The revolution they spearheaded produced a new, democratic political culture that enshrined national sovereignty, constitutionalism, and the rights of the people as indisputable principles.

Based upon previously untapped Qing and Republican sources, *The Politics of Rights and the 1911 Revolution in China* is a nuanced and colorful chronicle of the revolution as it occurred in local and regional areas. Xiaowei Zheng explores the ideas that motivated the revolution, the popularization of those ideas, and their animating impact on the Chinese people at large. The focus of the book is not on the success or failure of the revolution, but rather on the transformative effect that revolution has on people.

The Sexual Contract
30th Anniversary Edition,
With a New Preface by the Author
Carole Pateman

Thirty years after its initial publication, *The Sexual Contract* remains a groundbreaking work that challenges the standard view of the implications of the idea, deeply embedded in Western thought, that we should think of the state as if it were derived from an original contract. This award-winning book, by leading feminist political theorist Carole Pateman, provides a critique of the traditional social contract that continues to be relevant to discussions about the marriage contract and the employment contract, as well as to newer cases, such as the welfare contract and the environmental contract. With an updated preface by the author, this book speaks to ever-important questions about freedom and subordination.

"The Sexual Contract is one of the most challenging and thought-provoking books that I have read... it has significant implications for contemporary feminist debates."

Neoliberalism's Demons
On the Political Theology of Late Capital
Adam Kotsko

Neoliberalism is usually considered an economic policy agenda, but *Neoliberalism's Demons* argues that it is much more than that. A complete worldview, neoliberalism presents the competitive marketplace as the model for true human flourishing, transforming every aspect of our shared social life.

The book explores the sources of neoliberalism's remarkable success and the roots of its current decline. Neoliberalism's appeal is its promise of unfettered free choice, but that freedom is a trap. If we choose rightly, we ratify our own exploitation. If we choose wrongly, we are demonized as the cause of social ills. By tracing the political and theological roots of the neoliberal concept of freedom, Adam Kotsko offers a fresh perspective, one that emphasizes the dynamics of race, gender, and sexuality. He accounts for the rise of right-wing populism, arguing that, far from breaking with the neoliberal model, it actually doubles down on neoliberalism's most destructive features.

The Political Theory of Neoliberalism
Thomas Biebricher

Neoliberalism has become a dirty word. Yet the term remains necessary for understanding the varieties of capitalism across space and time. Arguing that neoliberalism is widely misunderstood when reduced to a doctrine of markets and economics alone, this book shows that it has a political dimension that we can reconstruct and critique. By examining the views of state, democracy, science, and politics in the work of six major figures—Eucken, Röpke, Rüstow, Hayek, Friedman, and Buchanan—*The Political Theory of Neoliberalism* offers the first comprehensive account of the varieties of neoliberal political thought. The book also interprets recent neoliberal reforms of the European Union to diagnose contemporary capitalism more generally. The latest economic crises hardly brought the neoliberal era to an end. Instead, as Thomas Biebricher shows, we are witnessing an authoritarian liberalism whose reign has only just begun.

The Time of Money

Lisa Adkins

Speculation is often associated with financial practices, but *The Time of Money* makes the case that it not be restricted to the financial sphere. It argues that the expansion of finance has created a distinctive social world, one that demands a speculative stance toward life in general. Speculation changes our relationship to time and organizes our social worlds to maximize productive capacities around flows of money. Defining features of our age are hardwired to speculative practices—stagnant wages, indebtedness, the centrality of women's earnings to the household, workfarism, and more. Examining five features of our contemporary economy, Lisa Adkins moves beyond claims that indebtedness is intrinsic to contemporary life and vague declarations that the social world has become financialized. She delivers a precise examination of the relation between finance and society, one that is rich in empirical and analytical detail.

The Art of Revolt

Snowden, Assange, Manning
Geoffroy de Lagasnerie

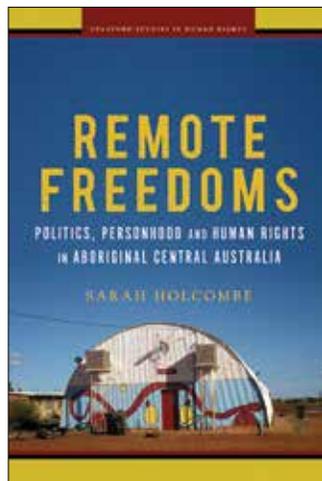

When not decried as traitors, Edward Snowden, Julian Assange, and Chelsea Manning are seen as whistle-blowers whose crucial revelations are meant to denounce a problem or correct an injustice. Yet, for Geoffroy de Lagasnerie, they are much more than that. They are exemplars who have reinvented an art of revolt. Consciously or not, they have inaugurated a new form of political action and a new identity for the political subject.

Anonymity as practiced by WikiLeaks and the flight and requests for asylum of Snowden and Assange break with traditional forms of democratic protest. As Lagasnerie suggests, such solitary choices challenge us to question classic modes of collective action, calling old conceptions of the state and citizenship into question. In the process, he pays homage to the actions and lives of these three figures.

"A striking and radical new perspective on truth-tellers in the Internet age."

Remote Freedoms

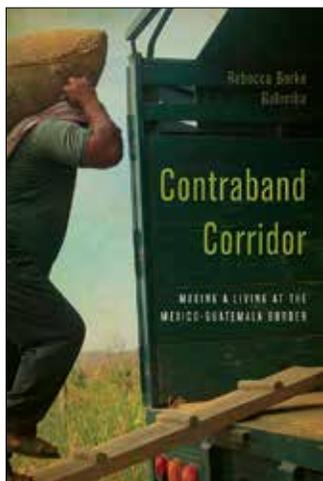

Politics, Personhood and
Human Rights in Aboriginal
Central Australia

Sarah E. Holcombe

This book investigates how universal human rights are understood, practiced, negotiated, and challenged in concert and in conflict with Indigenous rights. Moving between communities, government, regional NGOs, and international UN forums, Sarah E. Holcombe addresses how the notion of rights plays out within the distinctive and ambivalent sociopolitical context of Australia, focusing specifically on Indigenous women and their experiences of violence. Engaging in a translation of the Universal Declaration of Human Rights into the local Pintupi-Luritja vernacular and observing various indigenous interactions with law enforcement and domestic violence outreach programs, Holcombe reveals how, in the postcolonial Australian context, human rights are double-edged. They enforce assimilation to a neoliberal social order at the same time that they empower and enfranchise the Indigenous citizen as a political actor.

Contraband Corridor
Making a Living at the Mexico–Guatemala Border

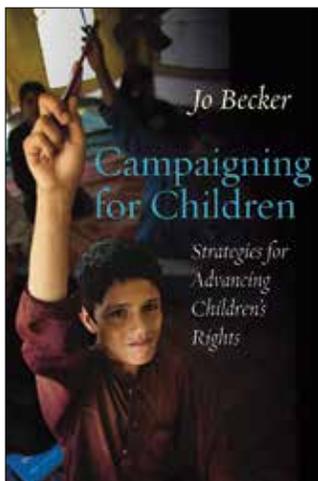

Rebecca Berke Galemba

The Mexico–Guatemala border has emerged as a geopolitical hotspot of illicit flows of both goods and people. *Contraband Corridor* seeks to understand the border from the perspective of its long-term inhabitants, including petty smugglers of corn, clothing, and coffee. Challenging assumptions regarding security, trade, and illegality, Rebecca Berke Galemba details how these residents engage in and justify extralegal practices. Rather than assuming that extralegal activities necessarily threaten the state and formal economy, Galemba's ethnography illustrates the complex ways that the formal, informal, legal, and illegal economies intertwine.

“Contraband Corridor dares to humanize those involved with the trafficking of contraband. An intimate approach to the lives of Mexico–Guatemala border inhabitants and their struggles to survive in neoliberal times.”

Campaigning for Children
Strategies for Advancing Children's Rights

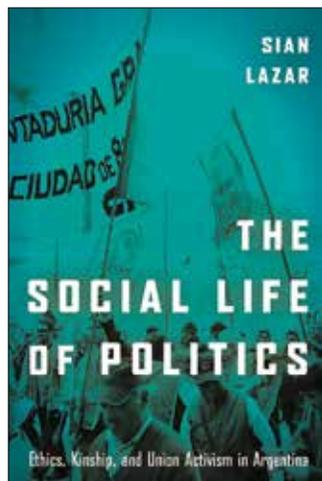

Jo Becker

Campaigning for Children focuses on contemporary children's rights, identifying the range of abuses that affect children today, including early marriage, female genital mutilation, child labor, child sex tourism, corporal punishment, the impact of armed conflict, and access to education. Jo Becker traces the last 25 years of the children's rights movement, including the evolution of international laws and standards to protect children from abuse and exploitation. From a practitioner's perspective, Becker provides readers with careful case studies of the organizations and campaigns that are making a difference in the lives of children, and the relevant strategies that have been successful—or not.

“Campaigning for Children, with its most compelling evidence, will go a long way in ensuring that human rights of children are protected worldwide.”

—Kailash Satyarthi,
Nobel Peace Prize Laureate and
Children's Rights Activist

The Social Life of Politics
Ethics, Kinship, and Union Activism in Argentina

Sian Lazar

A central motor of Argentine historical and political development since the early twentieth century, unions have been the site of active citizenship in both political participation and the distribution of social, economic, political, and cultural rights.

The Social Life of Politics examines the intimate, personal, and family dimensions of two political activist groups: the Union of National Civil Servants (UPCN) and the Association of State Workers (ATE). These two unions represent distinct political orientations within Argentina's broad and active labor movement. Sian Lazar shows how activists in both unions create themselves as particular kinds of militants and forms of political community. *The Social Life of Politics* places the lived experience of political activism into historical relief, and shows how ethics and family values deeply inform the process by which political actors are formed, understood, and joined together through collectivism.

Broke and Patriotic
Why Poor Americans Love Their Country

Francesco Duina

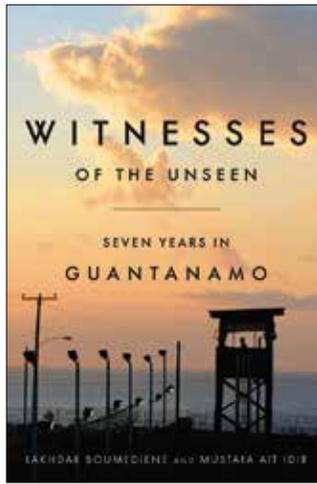

Why are poor Americans so patriotic? In *Broke and Patriotic*, Francesco Duina contends that the best way to answer this question is to speak directly to America's most impoverished. Spending time in bus stations, Laundromats, senior citizen centers, homeless shelters, public libraries, and fast food restaurants, he conducted over 60 revealing interviews in which his participants explain how they view themselves and their country. By giving them voice, Duina sheds new light on a sector of American society that we are only beginning to recognize as a powerful force in shaping the country's future.

"This is superlative ethnography, allowing voices too little heard to speak for themselves, and to do so with pride. Social understandings can be furthered more by this book than by any other in the marketplace."

—John A. Hall,
McGill University

Witnesses of the Unseen
Seven Years in Guantanamo

Lakhdar Boumediene and
Mustafa Ait Idir

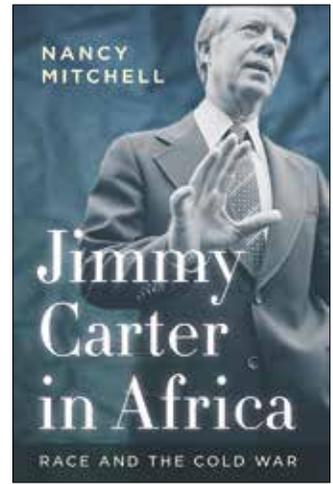

In 2001, Lakhdar Boumediene and Mustafa Ait Idir were arrested in Bosnia, wrongly accused of participating in a terrorist plot, and were flown, blindfolded and shackled, to Guantanamo Bay, Cuba. For seven years, they endured torture, harassment, force-feedings, and beatings. They had no opportunity to argue their innocence until 2008, when the Supreme Court issued a landmark ruling in their case, confirming Guantanamo detainees' constitutional right to challenge their detention. Weeks later, a federal judge, stunned by the absence of evidence against them, ordered their release. Now living in Europe and rebuilding their lives, Lakhdar and Mustafa share a story that every American ought to know.

"An intense, important read for anyone interested in the American government's misguided efforts at Guantanamo."

Jimmy Carter in Africa
Race and the Cold War

Nancy Mitchell

In the late 1970s, racism in the U.S. undermined Americans' efforts to "win hearts and minds" abroad and provided potent propaganda to the Kremlin. As President Carter confronted Africa, American foreign policy slammed up against the most explosive and raw aspect of American domestic politics—racism.

Drawing on candid interviews with Carter, as well as key diplomats, and on an array of international archival sources, Nancy Mitchell offers a timely reevaluation of the Carter administration and of the man himself. Mitchell reveals an administration not beset by weakness and indecision, but rather constrained by Cold War dynamics and by the president's own temperament as he wrestled with a divided public and his own human failings.

"A truly definitive account of one of the most challenging and important aspects of my presidency."

—Jimmy Carter,
Former President of
the United States
