### Slow Anti-Americanism *Social Movements and Symbolic Politics in Central Asia*

Edward Schatz

Negative views of the United States abound, but we know too little about how such views affect politics. Based on careful research on post-Soviet Central Asia, Edward Schatz argues that anti-Americanism is best seen not as a rising tide that swamps or as a conflagration that overwhelms. Rather, “America” is a symbolic resource that resides quietly in the mundane but always has potential value for social and political mobilizers. Using a wide range of evidence, Schatz considers how Islamist movements, human rights activists, and labor mobilizers across Central Asia avail themselves of this fact, thus changing their ability to pursue their respective agendas. Schatz refocuses our analytic gaze away from high politics for a clearer view of the slower moving, partially occluded, and socially embedded processes that ground how “America” becomes political.

### Whose Life Is Worth More? *Hierarchies of Risk and Death in Contemporary Wars*

Yagil Levy

Modern democracies face tough life-and-death choices in armed conflicts. Chief among them is how to weigh the value of soldiers’ lives against those of civilians on both sides. The first of its kind, *Whose Life Is Worth More?* reveals that how these decisions are made is much more nuanced than conventional wisdom suggests. When these states are entangled in prolonged conflicts, hierarchies emerge and evolve to weigh the value of human life.

Cultural narratives about the nature and necessity of war, public rhetoric about external threats facing the nation, antiwar movements, and democratic values all contribute to the perceived validity of civilian and soldier deaths. By looking beyond the military to the cultural and political factors that shape policies, this book provides tools to understand how democracies really decide whose life is worth more.

### Aiding and Abetting *U.S. Foreign Assistance and State Violence*

Jessica Trisko Darden

The United States is the world's leading foreign aid donor. Yet there has been little inquiry into how such assistance affects recipient nations. Drawing on four decades of data on U.S. economic and military aid, *Aiding and Abetting* explores whether foreign aid does more harm than good. Jessica Trisko Darden challenges long-standing ideas about aid and highlights key patterns in the relationship between assistance and violence. She persuasively demonstrates that many of the foreign aid policy challenges the U.S. faced in the Cold War era, such as the propping up of dictators friendly to U.S. interests, remain salient today. Historical case studies of Indonesia, El Salvador, and South Korea illustrate how aid can uphold human freedoms or propagate human rights abuses. *Aiding and Abetting* encourages both advocates and critics of foreign assistance to reconsider its political and social consequences by focusing international aid efforts on the expansion of human freedom.

### Leadership Decapitation *Strategic Targeting of Terrorist Organizations*

Jenna Jordan

One of the central pillars of US counterterrorism policy is that capturing or killing a terrorist group's leader is effective. Yet this pillar rests more on a foundation of faith than facts. In *Leadership Decapitation*, Jenna Jordan examines over a thousand instances of leadership targeting—involving groups such as Hamas, al Qaeda, Shining Path, and ISIS—to identify the successes, failures, and unintended consequences of this strategy. As Jordan demonstrates, group infrastructure, ideology, and popular support all play a role in determining how and why leadership decapitation succeeds or fails. Taking heed of these conditions is essential to an effective counterterrorism policy going forward.

### Learning the Lessons of Modern War

Edited by Thomas G. Mahnken

*Learning the Lessons of Modern War* examines the lessons of recent wars as a way of understanding continuity and change in the character and conduct of war. The volume brings together contributions from well-known scholars and practitioners from across the world to examine the conduct of recent wars in Iraq, Afghanistan, the Middle East, South America, and Asia. The book's first section explores the value of a contemporary approach to history and reflect on the value of learning lessons from the past. Its second section focuses on the wars in Iraq and Afghanistan. The book's third section examines the lessons of wars involving Russia, Israel, Sri Lanka, the Philippines, Georgia, and Colombia. It concludes by exploring overarching themes associated with the conduct of recent wars.

Containing a foreword by former National Security Adviser Lieutenant General H.R. McMaster, this book is an indispensable resource for international relations and security studies scholars, policymakers, and military professionals.

## Global Jihad

*A Brief History*

Glenn E. Robinson

Most violent jihadi movements in the twentieth century focused on the Muslim world. But following the 1979 Soviet invasion of Afghanistan, a new form of jihadism emerged—global jihad—with its primary locus in the international arena. With this book, Glenn E. Robinson develops a compelling, provocative argument about this movement's evolution. *Global Jihad* tells the story of four jihadi waves, each with its own program for achieving a global end: whether a Jihadi International to liberate Muslim lands from foreign occupation; al-Qa'ida's call to drive the United States out of the Muslim world; ISIS using "jihadi cool" to recruit followers; or leaderless efforts of stochastic terror. Robinson connects global jihad to other "movements of rage" like the Nazi Brownshirts or Khmer Rouge. Ultimately, he shows that while global jihad has posed a low strategic threat, it has instigated an outsized reaction from the United States and other Western nations.

## United Front

*Projecting Solidarity through Deliberation in Vietnam's Single-Party Legislature*

Paul Schuler

Conventional wisdom emerging from China and other autocracies claims that single-party legislatures and elections are mutually beneficial for citizens and autocrats. In *United Front*, Paul Schuler challenges these views by examining the past and present functioning of the Vietnam National Assembly (VNA), arguing that the legislature's primary role is to signal strength to the public. Schuler's argument suggests that there are limits to generating genuinely "consultative authoritarianism" through quasi-democratic institutions. Applying cutting-edge social science methods on original data like legislative speeches, election returns, and surveys, Schuler shows that even in a seemingly vociferous legislature like the VNA, the ultimate purpose of the institution is not to reflect the views of citizens, but rather to signal the regime's preferences while taking down rivals.

## Fateful Decisions

*Choices That Will Shape China's Future*

Edited by Thomas Fingar and Jean C. Oi

China's future will be determined by how its leaders manage the myriad interconnected challenges they face. In *Fateful Decisions*, leading experts from a wide range of disciplines eschew broad predictions of success or failure in favor of close analyses of today's most critical demographic, economic, social, political, and foreign policy challenges. Xi Jinping has articulated ambitious goals, but few priorities or policies to achieve them. Pursuing these goals requires difficult choices and tradeoffs. Contributors provide in-depth analyses of key policy choices, illuminate what is at stake, and illustrate possible outcomes.

**Russian Nuclear Orthodoxy**  
*Religion, Politics, and Strategy*

Dmitry Adamsky

A nuclear priesthood has arisen in Russia. From portable churches to the consecration of weapons systems, the Russian Orthodox Church has been integrated into every facet of the armed forces to become a vital part of Russian national security, politics, and identity. This extraordinary intertwining of church and military is nowhere more visible than in the nuclear weapons community, where the priesthood has penetrated all levels of command and the Church has positioned itself as a guardian of the state's nuclear potential. *Russian Nuclear Orthodoxy* highlights the implications of this phenomenon for international security and sheds light on the role of faith in modern militaries. The book also explores the consequences of the confluence of religion and strategy for other members of the nuclear club.

**Super Continent**  
*The Logic of Eurasian Integration*

Kent E. Calder

A Eurasian transformation is underway, and it flows from China. With a geopolitically central location, the country's domestic and international policies are poised to change the face of global affairs. The Belt and Road Initiative has called attention to a deepening Eurasian continentalism that has, argues Kent Calder, much more significant implications than have yet been recognized. In *Super Continent*, Calder presents a theoretically guided and empirically grounded explanation for these changes. In doing so, he underlines that the geo-economic logic that prevailed across Eurasia before Columbus, and that made the Silk Road a central thoroughfare of world affairs for close to two millennia, is re-asserting itself once again.

**The Politics of Space Security**  
*Strategic Restraint and the Pursuit of National Interests, Third Edition*

James Clay Moltz

For the past sixty years, countries have conducted military and civilian activities in space, but they have not yet fought in this environment. This book examines the international politics of the space age from 1957 to the present, the reasons why strategic restraint emerged among the major military powers, and how recent trends toward weaponization may challenge prior norms of conflict avoidance. James Clay Moltz explores the competing demands of national and global interests in preserving the safe use of space in the face of emerging threats.

This new edition offers analysis of the 2011 to 2018 period, including the second term of President Obama and the beginning of the Trump administration. Focusing on great power competition and cooperation, as well as questions related to the sustainability of national space policies, *The Politics of Space Security* is an authoritative history of the space age.

**Global Data Shock**  
*Strategic Ambiguity, Deception,  
and Surprise in an Age of  
Information Overload*

**Robert Mandel**

Intelligence and security communities have access to an overwhelming amount of information. Robert Mandel explores how information overload facilitates ambiguity, deception, and surprise, eroding international trust and cooperation in the Internet Age. A sweeping array of case studies illustrates the role of data shock in shaping global events from the 1990 Iraqi attack on Kuwait to Brexit. Too much information can lead to foreign intelligence failures, security policy incoherence, mass public frustrations, curtailment of democratic freedoms, and even international political anarchy. *Global Data Shock* addresses the pressing need for improved management of information and its strategic deployment.

*"This pertinent, well-written, and timely book addresses authoritatively and comprehensively the critical tension between the benefits of access to multitudinous data and the potentially pernicious consequences of being overwhelmed by it."*

**Proxy War**  
*The Least Bad Option*

**Tyrone L. Groh**

The U.S. has indirectly intervened in international conflicts on a relatively large scale for decades. Yet little is known about the immediate usefulness or long-term effectiveness of contemporary proxy warfare. Tyrone L. Groh explores the circumstances under which indirect warfare works best, how to evaluate it as a policy option, and the possible risks and rewards. *Proxy War* offers a fresh look at this strategy, using ten uncommon and understudied cases to investigate and illustrate the different types and uses of proxy war under varying conditions. What arises is a complete theoretical model of proxy warfare that can be applied to a wide range of situations. Proxy war is here to stay and will likely become more common as players on the international stage increasingly challenge U.S. dominance, making it more important than ever to deploy it.

**Diplomatic Security**  
*A Comparative Analysis*

**Edited by Eugenio Cusumano  
and Christopher Kinsey**

As diplomatic personnel are increasingly targeted by terrorism and political violence while overseas, sending states are augmenting host nations' security measures with their own. Yet, reinforced security may also hamper effective diplomacy and international relations. *Diplomatic Security* explores the global contexts and consequences of keeping embassies and their personnel safe.

The essays in this volume offer case studies that illustrate the different arrangements in the U.S., China, the U.K., France, Germany, Italy, Turkey, Israel, and Russia. Considering the historical and legal contexts, authors examine how states protect their diplomats abroad, what drives changes in protective arrangements, and how such measures affect the safety of diplomats and the institution of diplomacy. *Diplomatic Security* not only reveals how a wide variety of states handle security needs but also illuminates the broader theoretical and policy implications for the study of diplomacy and security alike.

## Crisis!

*When Political Parties Lose the Consent to Rule*

Cedric de Leon

Cedric de Leon analyzes two pivotal crises in the American two-party system: the demise of the Whig party and secession of eleven southern states in 1861, and the present crisis splintering the Democratic and Republican parties and leading to the election of Donald Trump. *Crisis!* takes us beyond the common explanations of social determinants to illuminate how political parties actively shape national stability and breakdown. Just as the Civil War meant the difference between the survival of a slaveholding republic and the birth of liberal democracy, what political elites and civil society organizations do today can mean the difference between fascism and democracy.

## 10% Less Democracy

*Why You Should Trust Elites a Little More and the Masses a Little Less*

Garrett Jones

During the 2016 presidential election, both Donald Trump and Bernie Sanders argued that elites were hurting the economy. But, drawing together evidence and theory from across economics, political science, and even finance, Garrett Jones says otherwise. In *10% Less Democracy*, he makes the case that the richest, most democratic nations would be better off if they slightly reduced accountability to the voting public, turning up the dial on elite influence. Discerning repeated patterns, Jones draws out practical suggestions for fine-tuning, focusing on the length of political terms, the independence of government agencies, the weight that voting systems give to the more-educated, and the value of listening more closely to a group of farsighted stakeholders with real skin in the game—a nation’s sovereign bondholders. Accessible to political news junkies while firmly rooted and rigorous, *10% Less Democracy* will fuel the national conversation about what optimal government looks like.

## Birthing a Movement

*Midwives, Law, and the Politics of Reproductive Care*

Renée Ann Cramer

Midwives in the United States live and work in a complex regulatory environment directly resulting from state and medical intervention into women’s reproductive capacity. In *Birthing a Movement*, Renée Ann Cramer draws on over a decade of ethnographic and archival research to examine the interactions of law, politics, and activism surrounding midwifery.

Framed by gripping narratives from midwives across the country, she parses out the often-paradoxical priorities with which they must engage. Professional midwives are legal and regulated in 32 states and illegal in eight. In the remaining ten states, Certified Professional Midwives (CPMs) are unregulated, but nominally legal. By studying states where CPMs have differing legal statuses, Cramer makes the case that midwives and their clients engage in various forms of sometimes-inconsistent mobilization to facilitate access to care, autonomy in childbirth, and the articulation of women’s authority in reproduction.

**Queer Alliances**  
*How Power Shapes Political Movement Formation*

Erin Mayo-Adam

*Queer Alliances* investigates coalition formation among LGBTQ, immigrant, and labor rights activists in the United States, revealing how these new alliances impact the inner workings of each respective political movement. Mayo-Adam examines the extent to which grassroots groups bridged historic divisions based on race, gender, class, and immigration status through the development of coalitions around LGBTQ rights in Washington State and immigrant and migrant rights in Arizona. Detailed, in-depth interviews center local, coalition-based mobilization across and within multiple movements rather than national campaigns and court cases. Mayo-Adam examines the extent to which these coalitions represent and serve intersectionally marginalized communities—groups that are often absent within contemporary accounts of social movement formation.

**Manifesto for a Dream**  
*Inequality, Constraint, and Radical Reform*

Michelle Jackson

Although it is well known that the United States has an inequality problem, social scientists have failed to mobilize in response. Their strikingly insipid, ostensibly science-based approach to policy reforms offers only incremental “interventions,” assuming that the best we can do is contain the problem. In *Manifesto for a Dream* Michelle Jackson asserts that we will never make strides toward equality if we do not start to think radically. It is the structure of social institutions that generates and maintains social inequality, and must be attacked for progress to be made. Jackson makes a scientific case for large-scale institutional reform, drawing on examples from other countries to demonstrate that reforms rejected in the United States are considered unproblematic in other contexts. She persuasively argues that an emboldened social science has an obligation to develop and test the radical policies that would be necessary to assure equality for all.

**Defense Management Reform**  
*How to Make the Pentagon Work Better and Cost Less*

Peter Levine

Pentagon spending has been the target of decades of criticism and reform efforts. Every Secretary of Defense for the last five Administrations has made it a priority to address perceived bloat and inefficiency by making management reform a major priority. The congressional defense committees have been just as active, yet few of these initiatives produce significant results.

In this book, Peter Levine addresses why, despite a long history of attempted reform, the Pentagon continues to struggle to reduce waste and inefficiency. The heart of *Defense Management Reform* is three case studies covering civilian personnel, acquisitions, and financial management. Narrated with the insight of an insider, the result is a clear understanding of what went wrong in the past and a set of concrete guidelines to plot a better future.

## Pursuing Citizenship in the Enforcement Era

Ming Hsu Chen

*Pursuing Citizenship in the Enforcement Era* examines the everyday perspectives of immigrants trying to integrate into American society when immigration policy is focused on enforcement and exclusion. The law says that everyone who is not a citizen is an alien, but Ming Hsu Chen argues that the citizen/alien binary should be reframed as a spectrum of citizenship, emphasizing continuities between the otherwise distinct experiences of membership and belonging for immigrants seeking citizenship. Bringing together theories of citizenship with empirical data on integration and analysis of contemporary policy, Chen argues that formal citizenship matters more than ever during times of enforcement and that constructing pathways to citizenship that enhance both formal and substantive equality of immigrants.

## Immigrant California

*Understanding the Past, Present, and Future of U.S. Policy*

Edited by David Scott  
FitzGerald and John D. Skrentny

If California were its own country, it would have the world’s fifth largest immigrant population. The way these newcomers are integrated into the state will shape California’s schools, workforce, businesses, public health, politics, and culture. In *Immigrant California*, leading experts in U.S. migration provide cutting-edge research on the incorporation of immigrants and their descendants in this bellwether state. California, unique for its diverse population, powerful economy, and progressive politics, provides important lessons for what to expect as demographic change comes to most states across the country. Contributors to this volume cover topics ranging from education systems to healthcare initiatives and unravel the sometimes-contradictory details of California’s immigration history. The volume shows how a state that was once the national leader in anti-immigrant policies quickly became a standard-bearer of greater accommodation.

## A New American Creed

*The Eclipse of Citizenship and Rise of Populism*

David H. Kamens

A new American creed has reconstructed the social contract. Generations from 1890 to 1940 took for granted that citizenship entailed voting, volunteering, religiosity, and civic consciousness. Conspicuously, the WWII generation introduced collectivist notions of civic obligations—but such obligations have since become regarded as options. In this book, David H. Kamens takes this basic shift as his starting point for exploring numerous trends in American political culture from the 1930s to the present day. Beyond painting a comprehensive picture of our current political landscape, Kamens offers an invaluable archive documenting the steps that got us here.

## The Immigrant Rights Movement

*The Battle over National Citizenship*

Walter J. Nicholls

In the months leading up to the 2016 presidential election, liberal outcry over Donald Trump's ethnonationalist views espoused a notion deeply embedded in American social life: we are a nation of immigrants. Given the pervasiveness of this rhetoric, it is easy to overlook its genesis in the not-too-distant past. Indeed, before 2010, there was no national immigrant rights movement equating immigrants to de facto Americans. This book tells the story of the movement's grassroots origins, through its meteoric rise to the national stage—and reveals tradeoffs made along the way.

## Politics of Empowerment

*Disability Rights and the Cycle of American Policy Reform*

David Pettinicchio

In *Politics of Empowerment*, David Pettinicchio offers a historically grounded analysis of the singular case of U.S. disability policy, countering long-held views of progress that privilege public demand as its primary driver. Beginning in the 1970s, a group of legislators and bureaucrats came to act as “political entrepreneurs,” and were seen as experts leading the movement within the government. But as they increasingly faced obstacles, nascent disability advocacy and protest groups took the cause to the American people, forming the basis of the contemporary disability rights movement. Drawing on extensive archival material, Pettinicchio redefines the relationship between grassroots advocacy and institutional politics, revealing a cycle of progress and backlash embedded in the American political system.

## Tyranny of Greed

*Trump, Corruption, and the Revolution to Come*

Timothy K. Kuhner

Democracy is being destroyed by an ancient evil and modernity is in denial. In the *Tyranny of Greed*, Timothy K. Kuhner reveals the United States to be a government by and for the wealthy, with Trump—the spirit of infinite greed—at its helm. Taking readers on a tour through evolutionary biology, psychology, and biblical sources, Kuhner explores how democracy emerged from religious and revolutionary awakenings. He argues that to overcome Trump's regime and establish real democracy, we must reconnect with that radical heritage. Our political tradition demands a revolution against corruption.

**Women as War Criminals**  
*Gender, Agency, and Justice*

**Izbela Steflja and  
Jessica Trisko Darden**

Women war criminals are far more common than we think. From the Holocaust to ethnic cleansing in the Balkans to the Rwandan genocide, women have perpetrated heinous crimes. Few have been punished. These women's very existence goes against our assumptions about war and about women as peaceful and innocent, and these biases in turn prevent postconflict justice systems from assigning women blame. *Women as War Criminals* argues that women are just as capable as men of committing war crimes and crimes against humanity. And women are uniquely adept at using gender instrumentally to fight for better conditions and reduced sentences when war ends. The book presents the postconflict legal cases of four women—the President (Biljana Plavšić), the Minister (Pauline Nyiramasuhuko), the Soldier (Lynndie England), and the Student (Hoda Muthana)—whose identity influenced their treatment by legal systems. Justice, Steflja and Trisko Darden show, is not blind to gender.

**The Arc of Protection**  
*Reforming the International  
Refugee Regime*

**T. Alexander Aleinikoff and  
Leah Zamore**

The international refugee regime is fundamentally broken. Designed in the wake of World War II, the system is unable to address the record numbers of persons displaced by conflict and violence today. States have put up fences and adopted policies to deny, deter, and detain asylum seekers. People recognized as refugees are routinely denied rights guaranteed by international law. The results are dismal for the millions of refugees around the world who are left with slender prospects to rebuild their lives or contribute to host communities. T. Alexander Aleinikoff and Leah Zamore lay bare the underlying global crisis of responsibility.

*The Arc of Protection* adopts a revisionist and critical perspective that examines the original premises of the international refugee regime. This book offers a way out of the current international morass through refocusing on responsibility-sharing, seeing the humanitarian-development divide in a new light, and putting refugee rights front and center.

## Limits

*Why Malthus Was Wrong

Giorgos Kallis

Western culture is infatuated with the dream of going beyond, even as it is increasingly haunted by the specter of apocalypse: drought, famine, nuclear winter. Re-reading Thomas Robert Malthus and his legacy, this book reclaims, redefines, and makes an impassioned plea for limits—a notion central to environmentalism—clearing them from their association with Malthusianism and the ideology and politics that go along with it. Limits are not something out there, a property of nature to be deciphered by scientists, but a choice that confronts us, one that, paradoxically, is part and parcel of the pursuit of freedom. Taking us from ancient Greece to Malthus, from hunter-gatherers to the Romantics, from anarchist feminists to 1970s radical environmentalists, *Limits* shows us how an institutionalized culture of sharing can make possible the collective self-limitation we so urgently need.

## Overcoming Isolationism

*Japan's Leadership in East Asian  
Security Multilateralism*

Paul Midford

This book asks why, in the wake of the Cold War, Japan suddenly reversed years of steadfast opposition to security cooperation with its neighbors. Long isolated and opposed to multilateral agreements, Japan proposed East Asia's first multilateral security forum in the early 1990s, emerging as a regional leader. *Overcoming Isolationism* explores what led to this surprising about-face and offers a corrective to the misperception that Japan's security strategy is reactive to US pressure and unresponsive to its neighbors. Paul Midford draws on newly released official documents and extensive interviews to reveal a quarter century of Japanese leadership in promoting regional security cooperation. He demonstrates that Japan has a much more nuanced relationship with its neighbors and has played a more significant leadership role in shaping East Asian security than has previously been recognized.

## These Islands Are Ours

*The Social Construction of  
Territorial Disputes in  
Northeast Asia*

Alexander Bukh

Territorial disputes are one of the main sources of tension in Northeast Asia. Escalation in such conflicts often stems from a widely shared public perception that the territory in question is of the utmost importance to the nation. While that's frequently not true in economic, military, or political terms, citizens' groups and other domestic actors throughout the region have mounted sustained campaigns to protect or recover disputed islands. Quite often, these campaigns have wide-ranging domestic and international consequences.

Focusing on non-state actors rather than political elites, Alexander Bukh explains how and why apparently inconsequential territories become central to national discourse in Japan, South Korea, and Taiwan. *These Islands Are Ours* gives us a new way to understand the nature of territorial disputes and how they inform national identities by exploring the processes of their social construction, and amplification.

**Asia's Regional Architecture**  
*Alliances and Institutions in the Pacific Century*

Andrew Yeo

*Asia's Regional Architecture* transcends traditional international relations models. It investigates change and continuity in Asia's complex array of bilateral and multilateral agreements through the lens of historical institutionalism. Refuting claims regarding the demise of the liberal international order, Andrew Yeo reveals how overlapping institutions can promote regional governance and reduce uncertainty in a global context. In addition to considering established institutions such as the Association of Southeast Asian Nations and the Asia-Pacific Economic Cooperation, he discusses newer regional arrangements including the East Asia Summit, Trans-Pacific Partnership, and the Belt and Road Initiative. This book has important implications for how policymakers think about institutional design and regionalism in Asia and beyond.

**Oilcraft**  
*The Myths of Scarcity and Security That Haunt U.S. Energy Policy*  
Robert Vitalis

There is a conventional wisdom about oil—that U.S. military presence in the Persian Gulf guarantees access to this strategic resource; that the “special” relationship with Saudi Arabia is necessary to stabilize an otherwise volatile market; and that these assumptions in turn provide Washington enormous leverage over Europe and Asia. Except, the conventional wisdom is wrong. Vitalis debunks the myths to reveal “oilcraft,” a line of magical thinking closer to witchcraft than statecraft. Oil is a commodity: bought, sold, and subject to market forces. Thus, the first goal of this book is to expose the suspect fears of scarcity and conflict. The second goal is to investigate the significant geopolitical impact of these false beliefs. In particular, Vitalis shows how we can reconsider the question of the U.S.–Saudi relationship. Freeing ourselves from the spell of oilcraft won't be easy—but the benefits make it essential.

**Unwitting Architect**  
*German Primacy and the Origins of Neoliberalism*  
Julian Germann

The global rise of neoliberalism since the 1970s is widely seen as a dynamic originating in the United States and the United Kingdom, and only belatedly and partially repeated by Germany. This book challenges this ruling narrative conceptually and empirically. It recasts the genesis of neoliberalism as a process driven by a plenitude of actors, ideas and interests. And it lays bare the pragmatic reasoning and counter-intuitive choices of German crisis managers that are obscured by this master story.

Drawing on extensive original archival research, *Unwitting Architect* argues that German officials did not intentionally set out to promote neoliberal change. Instead they were more intent on preserving Germany's export markets and competitiveness in order to stabilize the domestic compact between capital and labor.

### Cleft Capitalism

*The Social Origins of Failed Market Making in Egypt*

Amr Adly

Egypt has undergone significant economic liberalization, yet after more than four decades of economic reform, the Egyptian economy still fails to meet popular expectations for inclusive growth, better standards of living, and high-quality employment. *Cleft Capitalism* offers a new explanation for why market-based development can fail to meet expectations: small businesses are not growing into medium and larger businesses. The practical outcome of this missing middle syndrome is the continuous erosion of the economic and social privileges once enjoyed by the middle classes and unionized labor. With this book, Adly uncovers both an institutional explanation for Egypt's failed market making, and sheds light on the key factors of arrested economic development across the Global South.

### Cultural Values in Political Economy

Edited by J.P. Singh

The backlash against globalization and the rise of cultural anxiety has led to considerable re-thinking among social scientists. This book provides multiple theoretical, historical, and methodological orientations to examine these issues. While addressing the rise of populism worldwide, the volume provides explanations that cover periods of both cultural turbulence and stability. Issues addressed include populism and cultural anxiety, class, religion, arts and cultural diversity, global environment norms, international trade, and soft power.

The interdisciplinary scholarship from well-known scholars questions the oft-made assumption in political economy that holds culture "constant," which in practice means marginalizing it in the explanation. The volume conceptualizes culture as a repertoire of values and alternatives. Locating human interests in underlying cultural values does not make political economy's strategic or instrumental calculations of interests redundant: the instrumental logic follows a social context and a distribution of cultural values, while locating forms of decision-making that may not be rational.

### The Political Economy of Collective Action, Inequality, and Development

William D. Ferguson

This book examines how a society that is trapped in stagnation might initiate and sustain economic and political development. In this context, progress involves enhancing state capacity, balancing broad avenues for political input, and limiting concentrated private and public power. This juggling act can only be accomplished by resolving collective-action problems (CAPs), which arise when individuals pursue interests that generate undesirable outcomes for society at large. Merging and extending key perspectives on CAPs, inequality, and development, this book constructs a flexible framework to investigate these complex issues. By probing four basic hypotheses related to knowledge production, distribution, power, and innovation, William D. Ferguson offers an analytical foundation for comparing and evaluating approaches to development policy. This book promises an analytical lens for examining the interactions between inequality and development. Scholars across economic development and political economy will find it to be a highly useful guide.

## Full Spectrum Dominance

*Irregular Warfare and the War on Terror*

Maria Ryan

America's war on terror is widely defined by the Afghanistan and Iraq fronts. Yet, as this book demonstrates, both the international campaign and the new ways of fighting that grew out of it played out across multiple fronts beyond the Middle East. Maria Ryan shows how secondary fronts in the Philippines, sub-Saharan Africa, and Georgia and the Caspian Sea basin became key test sites for developing what the Department of Defense called "full spectrum dominance": mastery across the entire range of possible conflict, from conventional through irregular warfare.

*Full Spectrum Dominance* explores whether irregular warfare has been effective in creating global stability or if new terrorist groups have emerged in response to the intervention. As the U.S. has increasingly turned to irregular capabilities and objectives, understanding the underlying causes as well as the effects of the quest for full spectrum dominance becomes ever more important.

## Between Containment and Rollback

*The United States and the Cold War in Germany*

Christian F. Ostermann

In the aftermath of World War II, American diplomats and policymakers turned to the task of rebuilding Europe while keeping Communism at bay. Based on recently declassified documents, this book tells the story of U.S. policy toward East Germany from 1945 to 1953. As the American approach shifted between the policy of "containment" and more active "rollback" of Communist power, the Truman and Eisenhower administrations worked to undermine Soviet-backed Communist rule without compromising economic and nation-building interests in West Germany. There was a darker side to American policy in East Germany: covert operations, propaganda, and psychological warfare. This international history tracks relations between East German and Soviet Communists, providing new perspectives on U.S. foreign policy as Cold War tensions coalesced.

## Woodrow Wilson and the Reimagining of Eastern Europe

Larry Wolff

At the 1919 Paris Peace Conference, where the victorious Allied powers met to redraw the map of Europe in the aftermath of World War One, President Woodrow Wilson played an important role in the political restructuring of Eastern Europe. In this book, Larry Wolff explores how Wilson's principles of politics and international relations intersected with his "mental mapping" of Eastern Europe, how his ideas about the Ottoman and Habsburg empires evolved, how his personal friendships and connections shaped his view of Eastern Europe, and how the idea of "minority rights" developed in relation to the principle of national self-determination.

*"In this penetrating study Larry Wolff shows for the first time, with clarity and subtlety, how Wilson's 'mental map' of Eastern Europe took shape and what a difference it made to the region's fate."*

## The Hijacked War *The Story of Chinese POWs in the Korean War*

David Cheng Chang

The Korean War lasted for three years, one month, and two days—but armistice talks occupied more than two of those years, as 14,000 Chinese prisoners of war refused to return to Communist China, effectively hijacking the negotiations of world leaders at a pivotal moment in Cold War history. In *The Hijacked War*, David Cheng Chang vividly portrays the experiences of Chinese prisoners in the dark, cold, and damp tents of Kojé and Cheju islands in Korea and how their decisions derailed the high politics being conducted in Washington, Moscow, and Beijing. Drawing on newly declassified archival materials from China, Taiwan, and the United States and interviews with surviving Chinese and North Korean prisoners of war, Chang depicts the struggle over prisoner repatriation that dominated the second half of the Korean War—and changed the course of the Cold War in East Asia—in the prisoners' own words.

## In the Name of the Nation *India and Its Northeast*

Sanjib Baruah

In India, the eight states that border Myanmar, Bangladesh, Bhutan and the Tibetan areas of China are often referred to as just "the Northeast." *In the Name of the Nation* offers a critical and historical account of the country's troubled relations with this borderland region. Its modern history is shaped by the dynamics of a "frontier" in its multiple references: migration and settlement, resource extraction, and regional geopolitics. The political trajectory of the region has been different from the rest of the country, fostering both ethnic militias and functioning electoral institutions, remarkably high voter turnout rates, and special security laws that produce democracy deficits. Baruah offers a nuanced account of this impossibly complicated story, asking how democracy can be sustained, and deepened, in these conditions.

*"Elegantly written and cogent, Baruah's simultaneous 'insider-outsider' analysis of 'India's Northeast' is rich, nuanced, and multilayered."*

*An Intellectual Biography*  
Marcello Musto

In the last years of his life, Karl Marx expanded his research in new directions—studying recent anthropological discoveries, analyzing communal forms of ownership in precapitalist societies, supporting the populist movement in Russia, and expressing critiques of colonial oppression. With *The Last Years of Karl Marx*, Marcello Musto claims a renewed relevance for the late work of Marx, highlighting unpublished or previously neglected writings, many of which remain unavailable in English. Readers are invited to reconsider Marx's critique of European colonialism, his ideas on non-Western societies, and his theories on the possibility of revolution in noncapitalist countries. From Marx's late manuscripts, notebooks, and letters emerges an author markedly different from the one represented by many of his contemporary critics and followers alike.

**Across the Great Divide**  
*Between Analytic and Continental Political Theory*

Jeremy Arnold

The division between analytic and continental political theory remains as sharp as it is wide, rendering basic problems seemingly intractable. *Across the Great Divide* offers an account of how this split has shaped the field and suggests means of addressing it. Rather than advocating a synthesis of these philosophical modes, Arnold argues for aporetic cross-tradition theorizing: bringing together both traditions in order to show how each is at once necessary and limited.

Engaging with a range of fundamental political concepts and theorists—including the work of Stanley Cavell, Philip Pettit and Hannah Arendt, John Rawls, and Jacques Derrida—Arnold shows how we can better understand and address the pressing political issues of civil freedom and state justice today.

**Justice for Some**  
*Law and the Question of Palestine*  
Noura Erakat

*Justice for Some* offers a new approach to understanding the Palestinian struggle for freedom, told through the power and control of international law. Focusing on key junctures—from the Balfour Declaration in 1917 to present-day wars in Gaza—Erakat shows how the strategic deployment of law has shaped current conditions. Over the past century, the law has done more to advance Israel's interests than the Palestinians'. But, Erakat argues, this outcome was never inevitable. Law is politics, and its meaning and application depend on the political intervention of states and people alike. Within the law, change is possible, and international law can serve the cause of freedom when it is mobilized in support of a political movement.

## The Cult of the Constitution

Mary Anne Franks

WINNER OF THE 2020 PROSE AWARD IN LEGAL STUDIES, SPONSORED BY THE ASSOCIATION OF AMERICAN PUBLISHERS

*The Cult of the Constitution* reveals how deep fundamentalist strains in both conservative and liberal American thought keeps the Constitution in the service of white male supremacy.

Franks shows that as religious fundamentalists read their sacred scriptures, constitutional fundamentalists read the Constitution selectively and self-servingly. The worship of guns, speech, and the Internet in the name of the Constitution has blurred the boundaries between conduct and speech and between veneration and violence. *The Cult of the Constitution* lays bare the dark, antidemocratic consequences of constitutional fundamentalism and urges readers to take the Constitution seriously, not selectively.

*"Uncompromisingly critical, Franks challenges both liberal and conservative views of the Bill of Rights in the name of equality...agree or disagree with Franks's conclusions, her arguments require attention."*

## Dynasties and Democracy

*The Inherited Incumbency Advantage in Japan*

Daniel M. Smith

Although democracy is the antithesis of dynastic rule, families with multiple members in elective office continue to be common around the world. In most democracies, the proportion of such “democratic dynasties” declines over time, and rarely exceeds ten percent of all legislators. Japan is a startling exception, with over a quarter of all legislators in recent years being dynastic. In *Dynasties and Democracy*, Daniel M. Smith sets out to explain when and why dynasties persist in democracies, and why their numbers are only now beginning to wane in Japan—questions that have long perplexed regional experts. His findings shed light on the causes and consequences of dynastic politics around the world.

## Contested Embrace

*Transborder Membership Politics in Twentieth-Century Korea*

Jaeun Kim

*Contested Embrace* explores how a state relates to people it views as “external members,” such as emigrants and diasporas. Jaeun Kim analyzes disputes over the belonging of Koreans in Japan and China, focusing on their contested relationship with the colonial and postcolonial states in the Korean peninsula. Through a comparative analysis of transborder membership politics in the colonial, Cold War, and post-Cold War periods, the book shows how the configuration of geopolitics, bureaucratic techniques, and actors’ agency shapes the making, unmaking, and remaking of transborder ties. Kim demonstrates that being a “homeland” state or a member of the “transborder nation” is a precarious, arduous, and revocable political achievement.
